ABSTRACT

Yoga Education Website is online Yoga institute/classes website which provides information about different yoga course like health camp, Regular courses, meditation camps etc. From this website user can also buy different yoga related books.

Yoga Education website allow its user to view the different courses available and to gather information about courses provide by Institute. Yogis or User has to go Institute for enquires about the courses, course price and other details about course. The website makes it easily for customer to view courses and enroll course. And an electronic payment allows its customer to make cashless payments.

The main objective of this website is to create a dynamic website, where admin can add, update, remove or disable any course/book any time. And online enrolment makes easily to maintain records. It reduces the most of the paper work.

ACKNOWLEDGEMENT

It gives me immense pleasure to express my gratitude to those who are associated with my project “**Yoga Education website**” as a partial fulfillment of course **BACHELOR OF SCIENCE(INFORMATION TECHNOLOGY)** affiliated by the University of Mumbai.

I am very thankful to the principle of M.L.DAHANUKAR COLLEGE Dr. D. M. Doke for his kind co-operation in the completion of my project.

I am also grateful to our Head of Department “Smt. Archana Talekar” and my project guide “Smt. Supritha Bhandary and Smt. Navneet Kaur” for being resourceful, helpful and also for his constant support, that helped me completion of this project.

Last but not the least; I would like to thank IT Department all teaching and non-teaching staff who directly and indirectly helped me in the completion of this project.

DECLARATION

I hereby declare that the project entitled, “**Yoga Education website**” done at **MUMBAI**, has not been in any case duplicated to submit to any other university for the award of any degree. To the best of my knowledge other than me, no one has submitted to any other university.

The project is done in partial fulfillment of the requirement for the award of degree of **BACHELOR OF SCIENCE (INFORMATION TECHNOLOGY)** to be submitted is final semester project as part of our curriculum.

Abhishek V. Sawant.

Table Of Contents

CHAPTER 1: INTRODUCTION

- 1.1 Background
- 1.2 Objective
- 1.3 Purpose and Scope
 - 1.3.1 Purpose
 - 1.3.2 Scope
 - 1.3.3 Applicability
- 1.4 Organization of Reports

CHAPTER 2: SURVEY OF TECHNOLOGY

- 2.1 Front end
- 2.2 Back end
- 2.3 Survey
- 2.4 Statistic Diagram
- 2.5 Finding and observation

CHAPTER 3: REQUIREMENT & ANALYSIS

- 3.1 Problem Definition.
- 3.2 Hardware and software specification
 - 3.2.1 Software requirement
 - 3.2.2 Hardware requirement
- 3.3 Planning and Scheduling
 - 3.3.1 PERT diagram
 - 3.3.2 Gantt chart
- 3.4 Conceptual models
 - 3.4.1 Flow chart
 - 3.4.2 Use case
 - 3.4.3 Activity Diagram
 - 3.4.4 Entity relation Diagram.
 - 3.4.5 Class diagram
 - 3.4.6 Data flow diagram

CHAPTER 4: SYSTEM DESIGN

4.1 User Interface

4.2 Pseudo code

4.3 System Testing

CHAPTER 5: IMPLEMENTATION AND TESTING

5.1 Implementation Approach

5.2 Coding Details & Code Efficiency

5.3 Testing Approach

5.4 Modification and Improvement

5.5 Test case

CHAPTER 6: RESULTS AND DISCUSSION

6.1 Test Reports

6.2 User Documentation

CHAPTER 7: CONCLUSION

7.1 Conclusion

7.2 Limitations of the system

7.3 Future scope of project

References

CHAPTER 1

INTRODUCTION

1.1 Background:

Yoga first began in India. The word yoga comes from the Sanskrit word yuj which means ‘joining or integrating of all the aspects of the individual body with the mind and mind with the soul to achieve a happy, balanced and useful life’. It has changed over time and wide range of style of yoga now exists. Yoga is a popular way to increase flexibility, gain strength and reduce stress. The purpose of yoga is to build strength, awareness and harmony in both the mind and body. Yoga is reportedly one of best forms of exercise which gives numerous health benefits however to practice yoga you would need to take yoga education. Regular yoga practice creates mental clarity and calmness; increase body awareness; relieves chronic stress pattern; relax mind; centers attention and sharpness, concentration. While there are more than 100 different types, or school of yoga. Most sessions typically include breathing exercises, meditation and postures (sometimes called as asana or poses) that stretch and flex various muscle groups. Yoga education is a web application that provides you detail about yoga Regular courses, Special courses, health camps related to yoga.

1.2 Objective:

The main objective behind this is to make yoga education popular among people. To spread awareness about yoga is very important these days. Help people to learn about different types of yoga and how it can be used as a tool to help people stay healthy. The project aims to develop a website which provides you information about different yoga course like health camp, senior citizens camps, meditation camps etc. The user can choose on difficulty level, practice length and sequence type (quick flow, full practice and more). This website also provides you details about coming yoga events. The website also provides the feature of buying books. This web application can push the boundaries and grow your class to new heights. Share your classes with the world and boost your reach. Personalized services are provided through this site.

1.3 Purpose, Scope, Applicability:

1.3.1 Purpose:

- The main purpose behind this is to make yoga education popular among the present generation who are unaware about its benefits.
- To educate people about various means of overcoming stress naturally without any artificial medicines.
- Aims to make yoga more popular among people in different parts of world.
- Involve more number of people to participate in yoga.

1.3.2 Scope:

- The project scope is in yoga field. Making yoga popular among people in different parts of the world so that people are able to have correct option about this form which is not easy to practice but also extremely effective on long term basis.
- This application will allow the users to participate /enroll in different camps like health camps, senior citizen camps teachers training course, regular class special class, wellness programs etc.
- The website also provides the feature of buying books and products related to yoga.
- The website also provides you detail about upcoming yoga events.

1.3.3 Applicability:

The yoga education website is divided into five main modules each and every module performs a particular work .these four modules are as follow

1. User profile module: The main purpose for developing this module is to manager user profile. Use to display which course is enrolled by user and user details.
2. Course module: This module displays the different course/camps user can select and participate in different course/camps. Shows the content about course, Duration of camps, course timing, registration fees details
3. Book module: This website also provides feature of buying books related to yoga education. User can add books to the cart. User can do online payments.
4. contact Module: From this page user can send email or contact to institute.
5. profile module: In This module user can view his enrolments and orders

Other different modules are About Us page, Blog module, Contact module.

1.5 Organization of report:

Chapter 2:

In next part of this documentation will discuss about the new technology and survey about yoga .the will contain 10-12 questions.

Chapter 3:

Contains the requirements and problem definition .it deals with requirement specification, planning, scheduling Diagrams such as DFD, ER-diagrams sequence diagram will be used to explain conceptual working of project.

Chapter 4:

It includes the system design i.e. screen layouts, modules, sub-parts of bigger problem. It has schema design UI diagram and Test case designs.

CHAPTER 2

SURVEY OF TECHNOLOGY

2.1 FRONTEND:

Programing languages that can be used to make Web application:

1. **Java:** java is general purpose computer programming language that is concurrent ,class based, object based oriented and specifically designed to have as few implementation dependences as possible.it is intended to let application developers “write once, run anywhere “meaning that compiled java code can run for recompilation java is one of the most popular programming language in use.
2. **Python:** python is one of most commonly used programming language. It is free, open source programming language with extensive support modules and community development, use friendly data structure and GUI based desktop application. It is popular programming language for machine learning and deep learning application. Python is high level programming language used for general purpose programming with a simple syntax. Python has automatic memory management and dynamic feature that make it suitable to be used in a variety of application such as gaming, web application.
3. **PHP:** hypertext per processor or simply php is a server side scripting language designed for web development but also used as a general purpose programming language and support object oriented development. It is simple to understand because of its straight forward syntax .this language simply embeds the code in HTML.
4. **C and C++:** C is probably the oldest commonly used programming language and it is the root of other programming language c#, java, JavaScript. C++ is an enhanced version of c provides a valuable foundation for c++ development. Both c and c++ are considered as high performance languages. They are widely used in development application where performance is critical issue such as client/server applications.
5. **C# (c sharp):** is a general purpose language. The C# is the multi-paradigm and object oriented programming language develop by Microsoft as part of a .NET initiative. The syntax of C# language is similar to Java. The c# has combine feature of both c and c++ language. It is object oriented (class based) language.

6. **HTML:** Hypertext Markup Language is the standard markup language for documents designed to be displayed in a web browser. It can be assisted by technologies such as Cascading Style Sheets (CSS) and scripting languages such as JavaScript. HTML describes the structure of a web page semantically and originally included cues for the appearance of the document. HTML provides a means to create structured documents by denoting structural semantics for text such as headings, paragraphs, lists, links, quotes and other items.

Reason for selecting HTML and PHP as Front End:

HTML is Hypertext Markup language which describes the structure of web pages and it is the backbone of front-end of a website whereas PHP is an open source, a popular server-side scripting language which will be used for development of dynamic web applications and websites, static websites etc.

HTML is used to format the content on the website, decides the look of website whereas PHP is used to make the page function as expected.

HTML is used to insert text, images, hyperlinks, videos etc. through Hypertext whereas Using PHP we can perform so many things such as connect to the database and retrieve information, sending emails to users of a website, encryption of data, storing data in database etc.

PHP can be embedded in HTML, and it's appropriate for the creation of dynamic web pages and database applications. PHP scripts can be included in HTML web pages and executed on the server and display results on screen with help of HTML. PHP can be integrated with different types of databases like Oracle, MySQL, and Microsoft SQL Server etc.

Front-end Framework:

In the world of web design, to give a more straight forward definition, a framework is defined as a package made up of a structure of files and folders of standardized code (HTML, CSS, JS documents etc.) which can be used to support the development of websites, as a basis to start building a site.

The aim of frameworks is to provide a common structure so that developers don't have to redo it from scratch and can reuse the code provided. In this way, frameworks allow us to cut out much of the work and save a lot of time.

I am using Bootstrap as front-end Framework:

Bootstrap is a free and open-source CSS framework directed at responsive, mobile-first front-end web development. It contains CSS and (optionally) JavaScript-based design templates for typography, forms, buttons, navigation, and other interface components.

2.2 BACK END

Data base for web application

1. **Oracle Cloud:** Oracle cloud is a cloud computing servers offered by Oracle Corporation provide servers, storage, network application and services through a global network of oracle corporation management database centres. This platform supports numerous open standards (SQL, HTML etc.), open source solution (Hadoop) and a variety of programming languages database, tools and framework including oracle specific, open source, and third party software and system.
2. **Oracle Database:** Commonly referred as Oracle RDBMS or simple as oracle is a multi-model database management system. It is a database commonly used for running online transaction processing (OLTP), data warehousing (DW) and mixed (OLTP & DW) database workloads. Oracle supports data migration, replication, and searches as well as backups database conversion, monitoring and performance analysis.
3. **Mongo DB:** Mongo DB is a cross platform document oriented database programme, classified as a NOSQL database programme. Mongo DB uses JSON like document with schema. It is database which can be process large data simultaneously and use internal memory so that data is easily accessible, use of very complex joins is not there, and scaling is easily possible. Queries can be easily optimized for output.
4. **MySQL:** MySQL is an open source relational database management system (RDBMS). MySQL is free and open source software under the terms of the GNU General Public License and is also available under variety of proprietary licenses. High speed of processing data, use of triggers increase productivity, with rollback and commit help in data recovery if required.
5. **Microsoft SQL Server:** is a relational data base management system developed by Microsoft. As a data base server it is a software product with primary function of storing and retrieving data a request by other software application, which may run either on the same computer or on another computer across network. SQL server is database solution for small to long enterprise. It makes use of data compression technique to reduce your data storage need.

Reason for selecting MySQL as Backend:

1. Data Security:

MySQL is globally renowned for being the most secure and reliable database management system used in popular web applications including WordPress, Drupal, Facebook and Twitter. The data security and support for transactional processing that accompany the recent version of MySQL can greatly benefit any business, especially if it is an ecommerce business that involves frequent money transfers.

2. On-Demand Scalability:

MySQL offers unmatched scalability to facilitate the management of deeply embedded apps using a smaller footprint, even in massive warehouses that stack terabytes of data. On demand flexibility is the star feature of MySQL. This open source solution allows complete customization to ecommerce businesses with unique database server requirements.

3. High Performance:

MySQL features a distinct storage-engine framework that facilitates system administrators to configure the MySQL database server for a flawless performance. Whether it is an ecommerce website that receives a million queries every single day or a high-speed transactional processing system, MySQL is designed to meet even the most demanding applications while ensuring optimum speed, full-text indexes and unique memory caches for enhanced performance.

4. Round-the-Clock Uptime:

MySQL comes with the assurance of 24x7 uptime and offers a wide range of high availability solutions, including specialized cluster servers and master/slave replication configurations.

5. Comprehensive Transactional Support:

MySQL tops the list of robust transactional database engines available on the market. With features such as complete atomic, consistent, isolated, durable transaction support; multi-version transaction support; and unrestricted row-level locking, it is the go-to solution for full data integrity. It guarantees instant deadlock identification through server-enforced referential integrity.

6. Complete Workflow Control:

With an average download and installation time of less than 30 minutes, MySQL means usability from day one. Whether your platform is Linux, Microsoft, Macintosh or UNIX, MySQL is a comprehensive solution with self-management features that automate everything from space expansion and configuration to data design and database administration.

7. Reduced Total Cost of Ownership:

By migrating current database apps to MySQL, enterprises enjoy significant cost savings on new projects. The dependability and ease of management can save troubleshooting time that is otherwise wasted in fixing downtime issues and performance problems.

8. The Flexibility of Open Source:

All the fears and worries that arise in an open-source solution can be brought to an end with MySQL's round-the-clock support and enterprise indemnification. The secure processing and trusted software of MySQL combine to provide effective transactions for large-volume projects. It makes maintenance, debugging and upgrades fast and easy while enhancing the end-user experience.

Yoga Education Web application

I am student of M.L.Dahanukar college From TYBSC-IT and I am doing survey about yoga Education as part of my project.

This project aims to create a web application which provides you information about different course and yoga events.

It would be great if you could spare a few minutes to fill out these questions .

*Required

1. Have you ever practiced yoga before ? *

Mark only one oval.

- Yes
- No

2. How long have you practiced yoga ? *

Mark only one oval.

- I have recently started a yoga practice
- Less than 2 years
- 2-5 years
- Haven't yet

3. Which forms of yoga do you practice ? *

Mark only one oval.

- Asana
- Pranayam
- Seated meditation
- Other: _____

4. How often do you practice yoga ? *

Mark only one oval.

- Everyday
- 1-3 days of week
- 3-5 days of week
- Never

5. At what time of day will you be interested in attending a yoga class ? *

Mark only one oval.

- Between 6am - 9am
- Between 9am - 12am
- Between 12am - 3pm
- Between 3pm - 6pm
- Between 6pm - 9pm
- Other: _____

6. What length of yoga class/session will you be interested in taking ?? *

Mark only one oval.

30 min

60 min

90 min

120 min

Other: _____

7. If you have practiced yoga, What did/do you find the biggest benefit ? *

Mark only one oval.

A good all over body workout

Relaxation and Mindfulness

Greater flexibility

An escape from life Stresses

Other: _____

8. Do you suffer from stress /anxiety ?? *

Mark only one oval.

Yes

No

Sometimes

9. How much do you expect to pay per class /session? *

Mark only one oval.

Less than 200 rupees

Between 200 - 500 rupees

Between 500 - 1000 rupees

Other

10. Do you think yoga is better than other modern methods of getting fit ?? *

Mark only one oval.

Yes

No

2.5 Findings and Observation:

From the analysis of survey conducted, approximately 94% of the people involved agreed that the yoga is better than other modern methods of getting fit. According to survey 40% of the people practice Asana and 32.7% of people practice seated mediation and 27.3% of people do pranayama. Approximately 9% of people practice yoga every day and 40% of people practice yoga 1-3 days of week and 36.4% of people do yoga 3-5 days of week. Also 23.6% of people recently started practicing yoga and 52.7% of people practicing yoga less than 2 years. 14.5% of people doing yoga from last 2-5 years.

According to survey 65.5% of people are interested in attending a yoga class between 6am-9am and 14.5% and 11% people are interested in attending yoga class at 9am-12pm and 12am-3pm respectively. 45.5% of people are interested in taking 30min yoga session. And 23.6% and 21.8% of people are interested in 60min and 90min sessions respectively. 43.6% of people agreed that yoga's biggest benefit is Relaxation and mindfulness and 21.8% people think that yoga is good for all over body workout and escape from life stress and 12.7% of people think that yoga is good for flexibility. 45.5% are interested to pay less than 200 rupees per session and 32.7% of people are interested to pay between 200-500 rupees and 21.8% of people interested to pay between 500-1000 rupees per session/class.

CHAPTER 3

REQUIREMENT AND ANALYSIS

3.1 Problem definition:

Yoga first began in India. Yoga exists from ancient time of India. Yoga is rapidly the best form of exercise which gives numerous health benefits. However to practice yoga, you need to take yoga education. People can learn different forms of Yoga using this application. For those who are interested in Yoga are willing to practice Yoga. For them this website provides variety of courses so that user can improve their form and guide them to practice Yoga. It is use to web application.

There are more than 100 types of Yoga forms are exist. This website will provide list of courses that benefits its users. Any age group user can perform this course. The user can choose his own difficulty level and practice level. This application provides you feature of buying yoga related products like books, mates, and exercise outfit, diet food etc. which are difficult to find in market bookstores, but there are variety can find in books on this websites. On this site user can find small yoga related events. These events content short courses, camps, social activities.

3.2 Hardware and Software Requirements:

3.2.1 Software Requirement:

- Operating system: window ,Linux
- Web browser: All industry standard web Browsers(Internet Explore , Firefox , Google chrome)
- Web Server : XAMP
- Database : Mysql , PhpMyAdmin

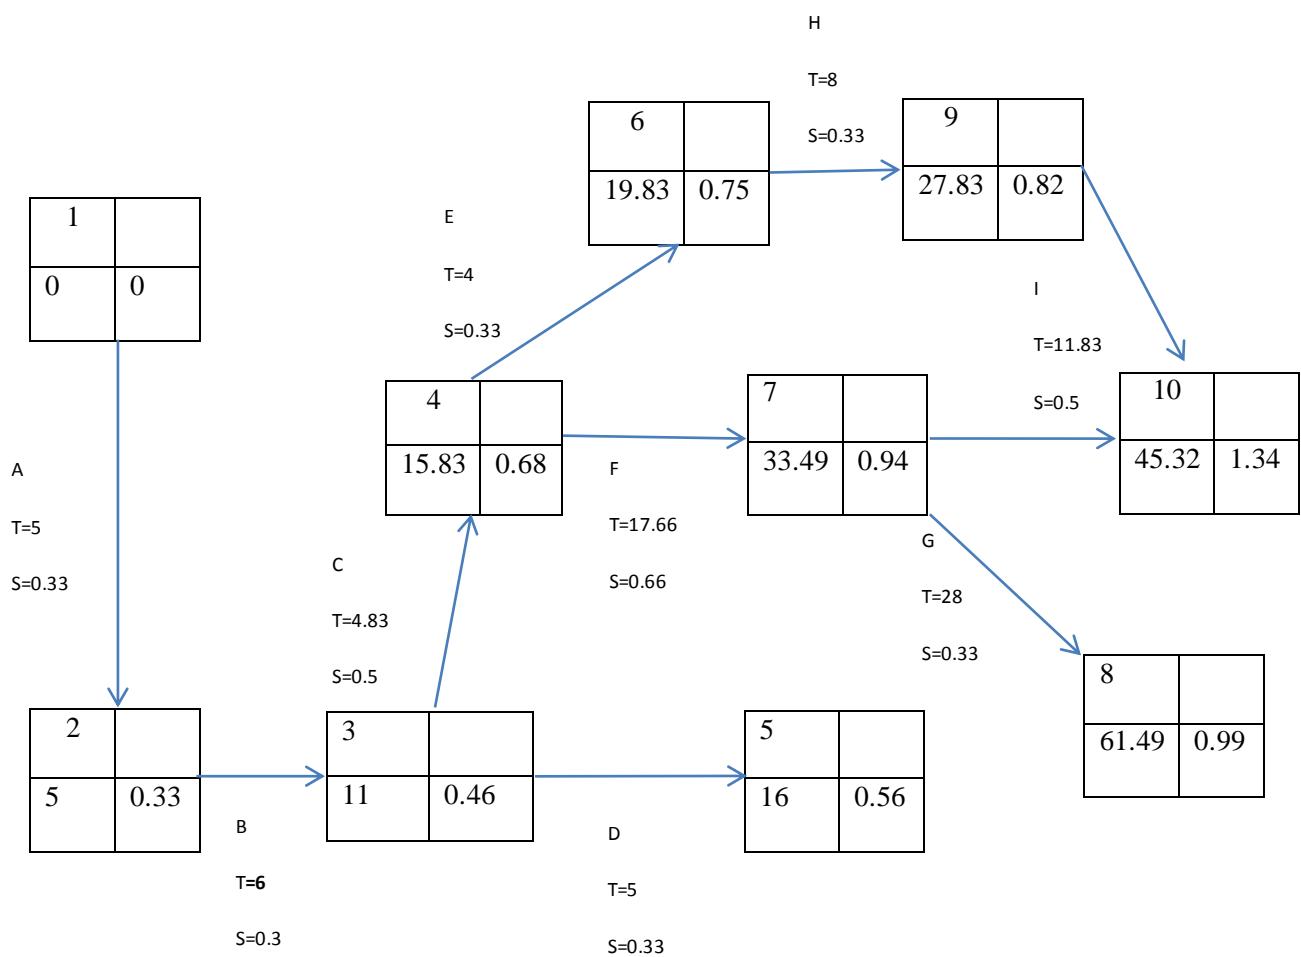

3.2.2 Hardware Requirement:

- Processor :minimum 1GHz Recommended 2GHz or more
- Memory of 2GB Ram or more.
- A minimum of 100 GB of available space on hard drive.
- Internet connection with a speed of 4Mbps or higher
- External hard drive or DVD's for backups

3.3 Planning and Scheduling:

3.3.1 PERT DIAGRAM:

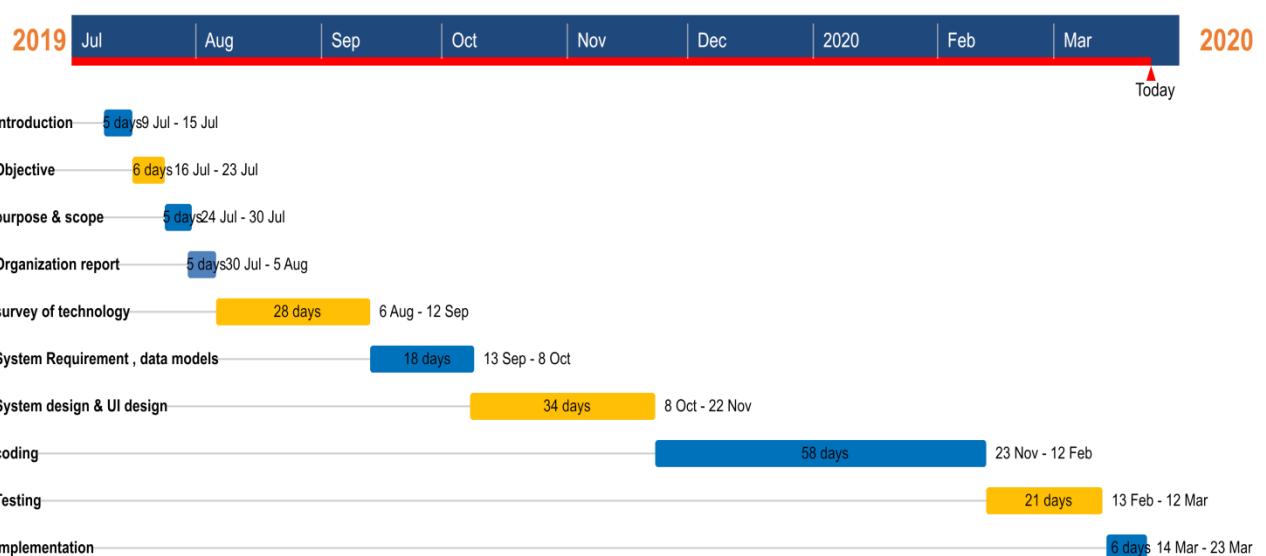

Activity	Precedent s	Optimistic(a)	Most Likely(m)	Pessimistic(b)	Expected Duration(te)	Standard Deviation(s)
A-Introduction		4	5	6	5	0.33
B-Objectives	A	5	6	7	6	0.33
C-Purpose ,scope, and system requirement's	B	3	5	6	4.83	0.5
D-Achievement	B	4	5	6	5	0.33
E-Organization Report	C	3	4	5	4	0.33
F-Survey of technology	C	15	18	19	17.66	0.66
G-Survey Questionnaires	F	27	28	29	28	0.33
H-Data models	E	7	8	9	8	0.33
I-System design ,UI design	H,F	10	12	13	11.83	0.5

3.3.2 GANTT CHART:

A Gantt chart, commonly used in a project management, is one of the most popular and useful ways of showing activities displayed against time. On the left of the chart is a list of activities and along the top is a suitable time scale. Each activity is represented by a bar, the position and length of the bar reflects the start date, duration and end date of the activities.

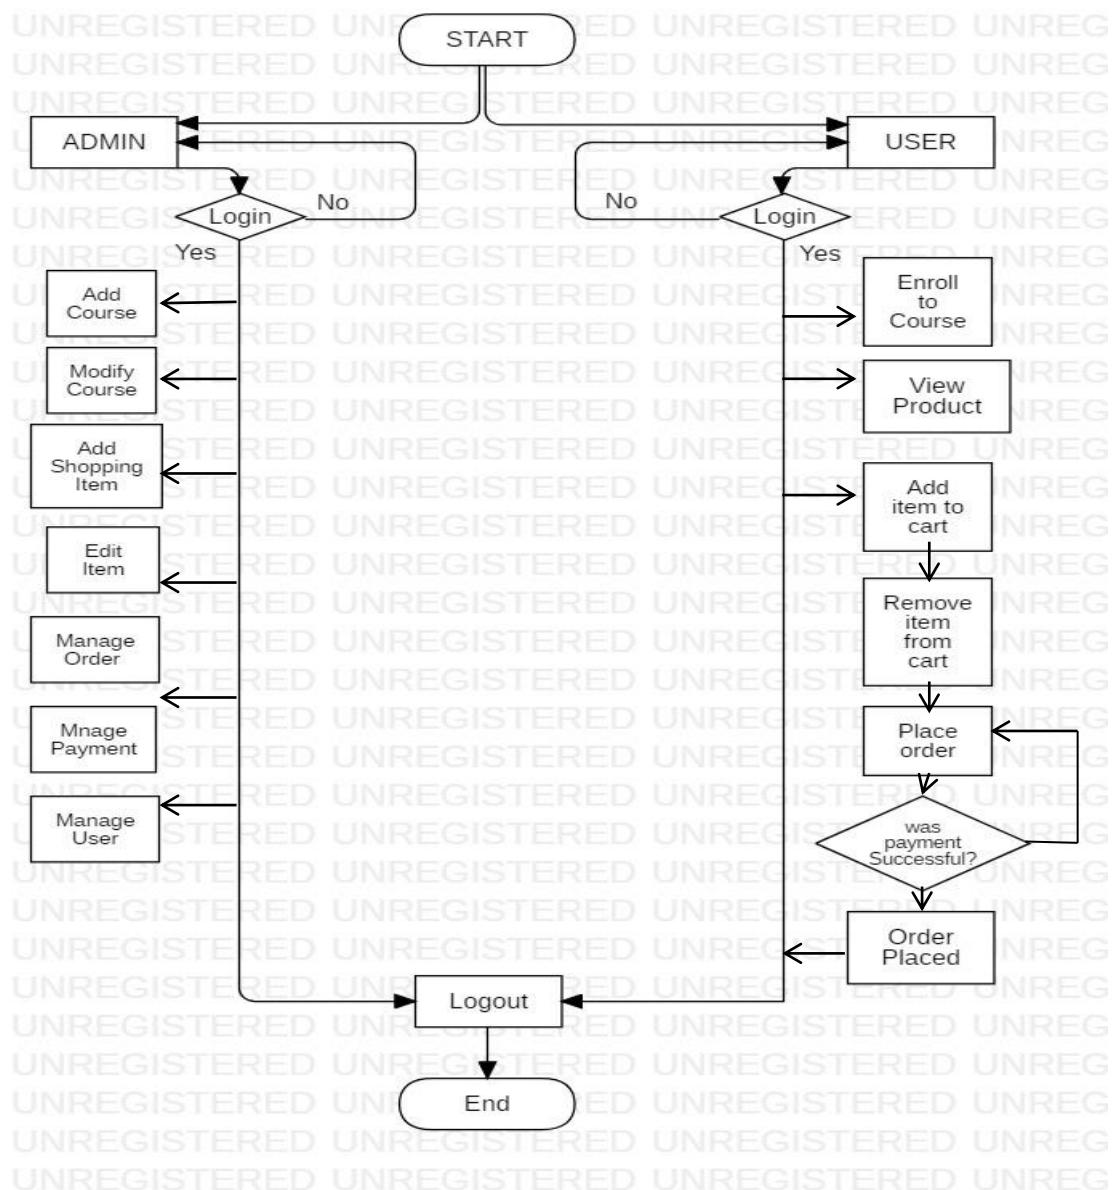

Title	T/M	Start	End	%	
Introduction	T	09/07/2019	15/07/2019	5 days	%
Objective	T	16/07/2019	23/07/2019	6 days	%
purpose & scope	T	24/07/2019	30/07/2019	5 days	%
Organization report	T	30/07/2019	05/08/2019	5 days	%
survey of technology	T	06/08/2019	12/09/2019	28 days	%
System Requirement , data models	T	13/09/2019	08/10/2019	18 days	%
System design & UI design	T	08/10/2019	22/11/2019	34 days	%
coding	T	23/11/2019	12/02/2020	58 days	%
Testing	T	13/02/2020	12/03/2020	21 days	%
Implementation	T	14/03/2020	23/03/2020	6 days	%

3.4 Conceptual Models:

1 Flowchart:

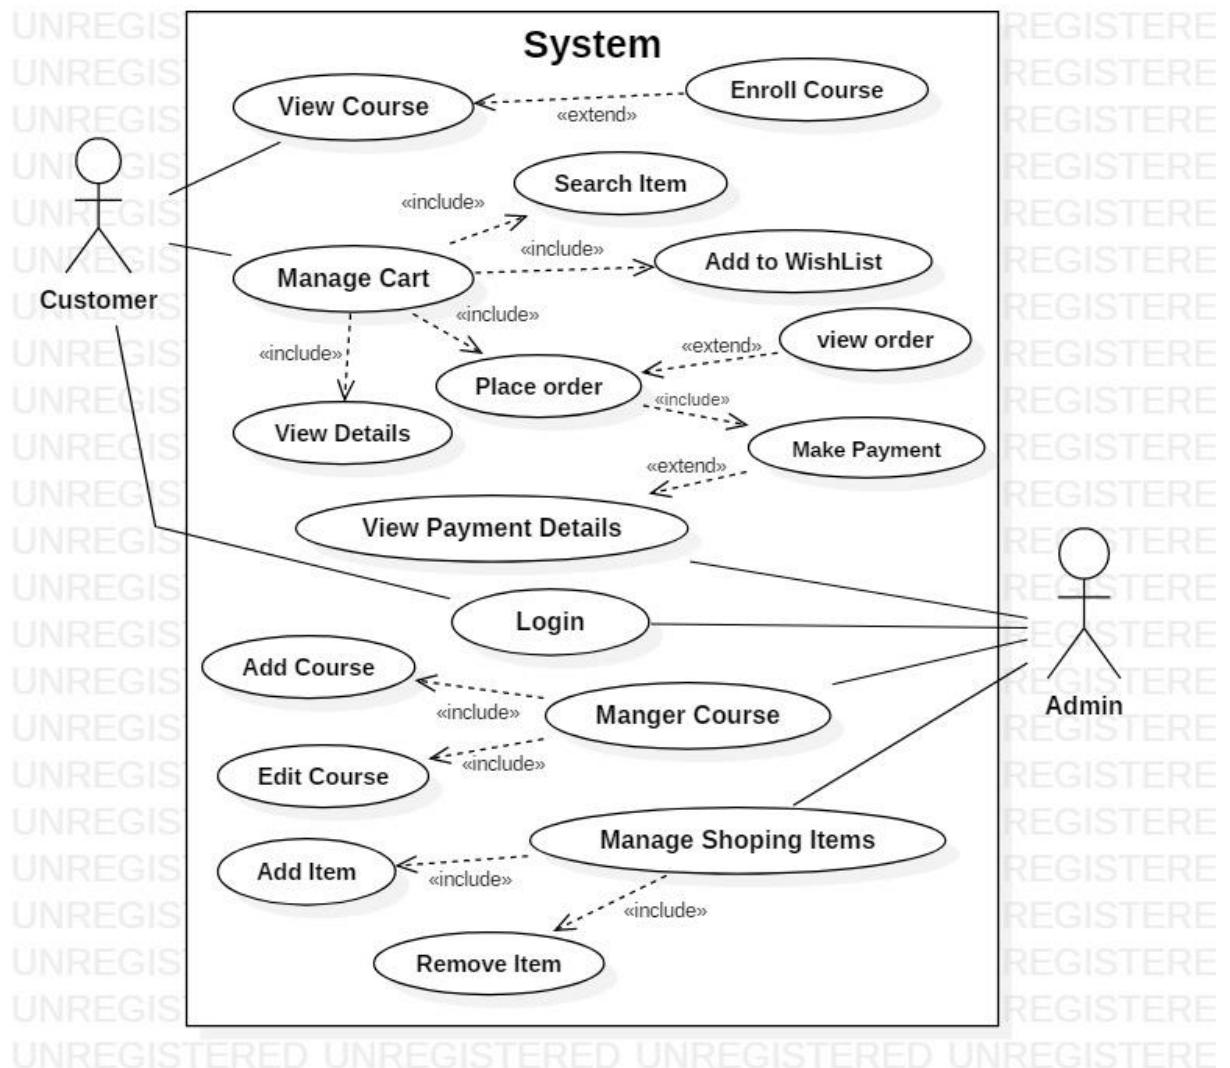

A **flowchart** is a type of Diagram that represents a workflow or process. A flowchart can also be defined as a diagrammatic representation of an algorithm, a step-by-step approach to solving a task. The flowchart shows the steps as boxes of various kinds, and their order by connecting the boxes with arrows. This diagrammatic representation illustrates a solution model to a given problem. Flowcharts are used in analyzing, designing, documenting or managing a process or program in various fields. The Admin signs-in, he can add course, modify course ,add new shopping items, edit items description ,manage shopping orders ,manage payments and users. If the user signs in, he can Enroll to any course , view product ,also can add and Remove item from cart ,place order ,make payment if payment is successful then order is placed ,if not then the user is redirected to placed order page.

2. Use case:

A **use case diagram** at its simplest is a representation of a user's interaction with the system that shows the relationship between the user and the different use case in which the user is involved. A use case diagram can identify the different types of users of a system and the different use cases. The use cases are represented by either circles or ellipses. User is also known as actors. An effective use case diagram can help your team discuss and represents:

- Scenarios in which your system or application interact with people, organization or external systems.
- Goals that your system or application helps those entities (known as actors) achieve.
- The scope of project.

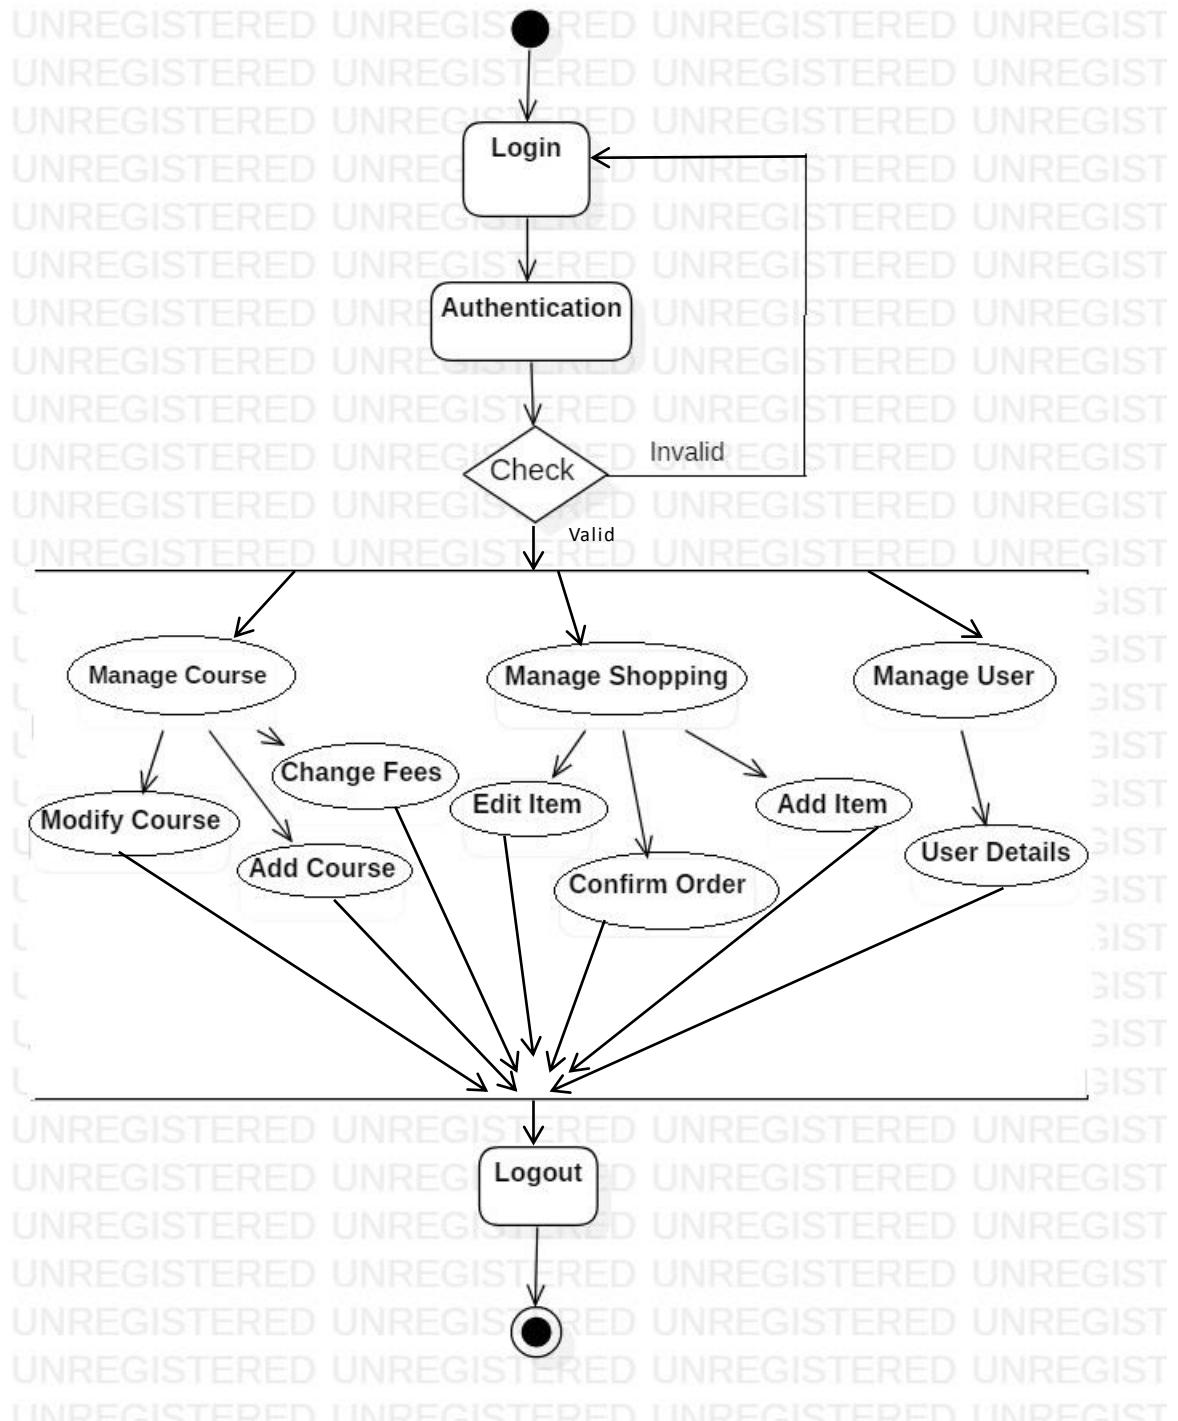

3. Activity Diagram:

Activity Diagram is a flow chart used to represent the flow from one activity to another activity .The activity can be described as an operation of the system.

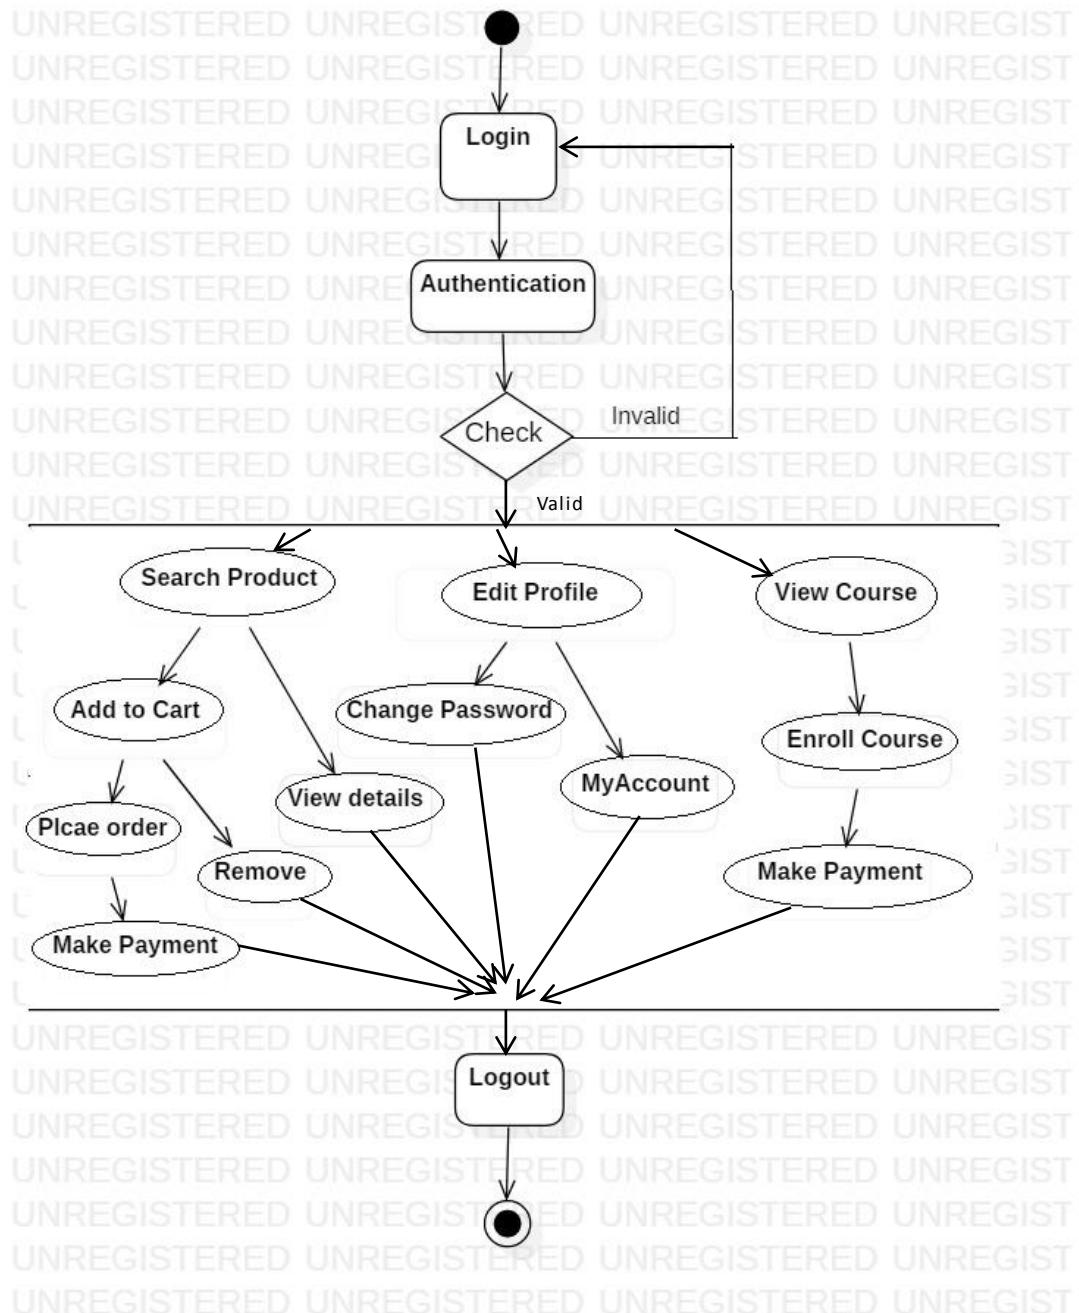

➤ Activity Diagram for Admin Side:

The Admin sign in, the admin is direct to the admin page where he needs to manage course, manage shopping item, manage user. Admin can add new course, modify course details, add new item to shopping list and confirm the user order and he/she can view the details of users.

➤ Activity Diagram for User side:

The User sign in, the is direct to user interface where he can Enroll to any course and can view different yoga related products .user selects the items he wants to order .selected items are added to the cart . User can review their cart and place order .when the order is placed user is redirect to payment option, if the payment is successful then the order is placed else user is direct to placed order page.

4. Entity Relation Diagram:

Entity Relationship Diagram, also known as ERD, ER Diagram or ER model, is a type of structural diagram for use in database design. An ERD contains different symbols and connectors that visualize two important information : **The major entities within the system scope**, and the **inter-relationships among these entities**.

And that's why it's called "Entity" "Relationship" diagram (ERD)!

In this project there are 6 main entity (Customer ,Admin ,course ,order ,events, payments)The customer can enroll to a course .the customer can gives order and admin can view those order. Customer can view different yoga related events .customer can select payment option

First step – Identify the Entities

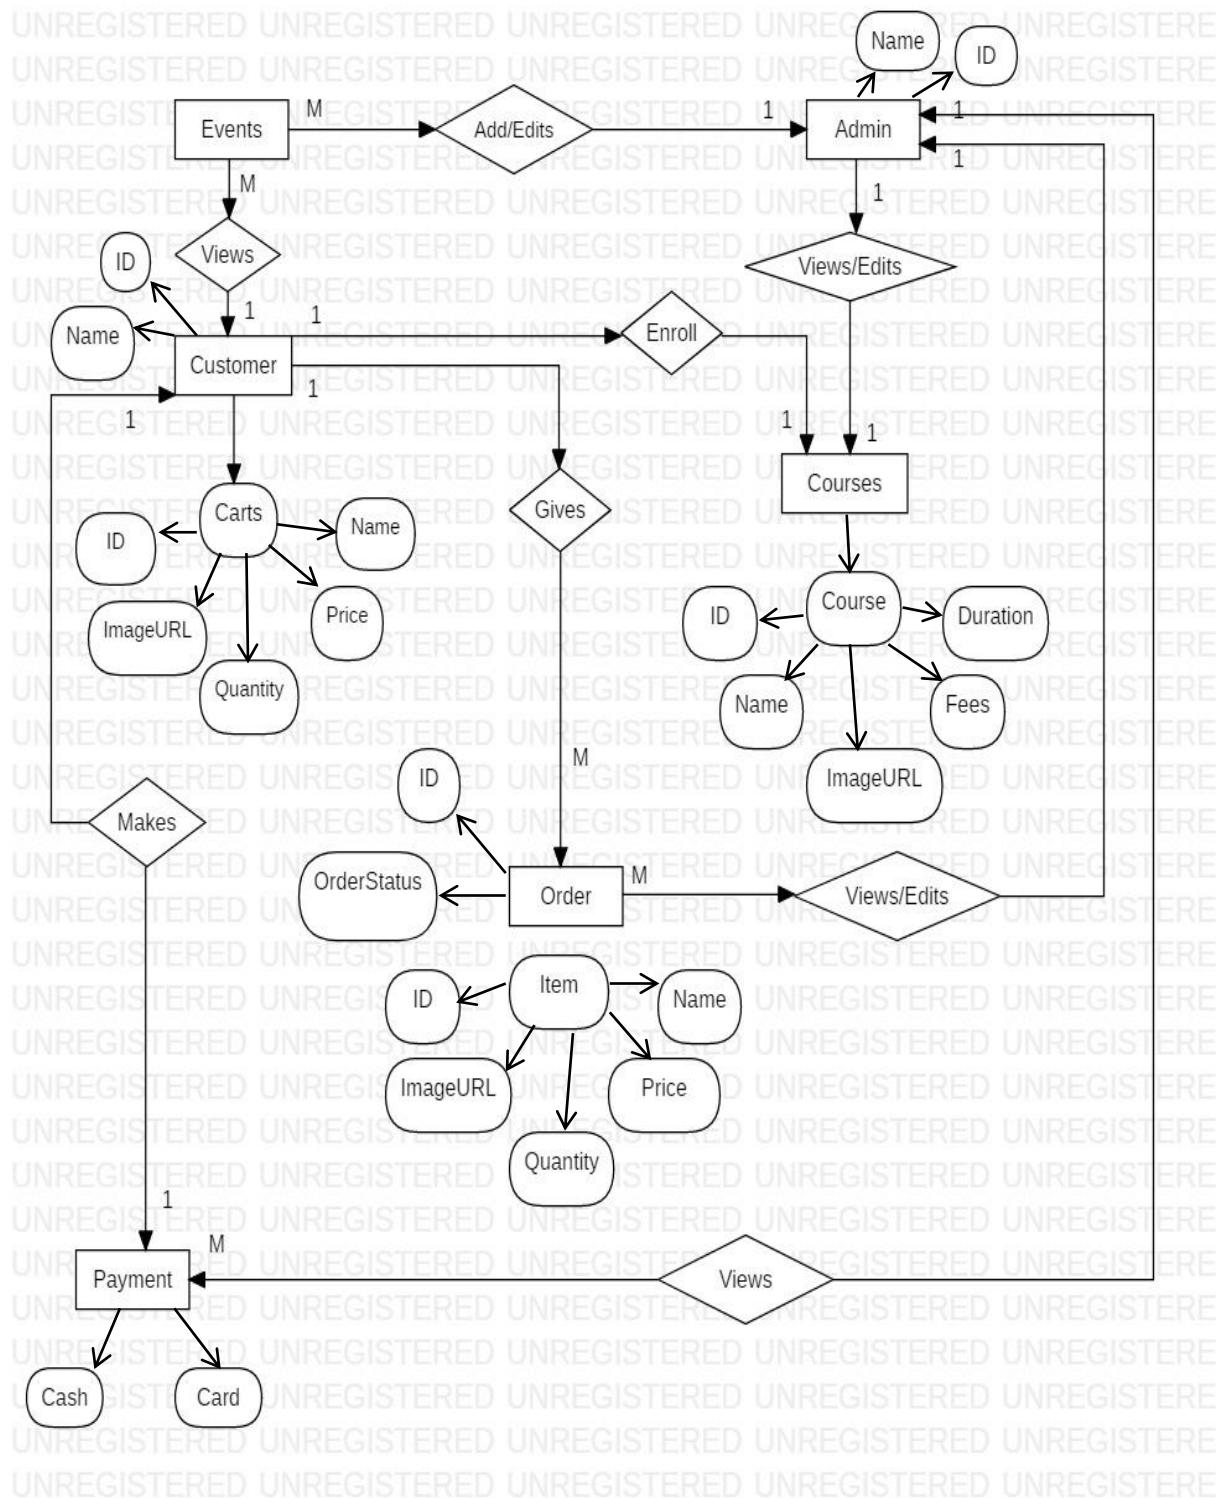

- Customer
- Admin
- Course
- Order
- Events
- Payments

Second step –Identify the relationships

- Customer enroll course and admin can view and edit these course
- Customer gives order admin can view and confirm these orders
- Customer views events and admin can view and edit those events
- Customer makes payments admin can view payments

Third step –identify the cardinality

- One Customer can enroll one course
- One customer can make one payment at a time
- One customer can gives multiple order
- One customer can view multiple events
- One Admin can view one course
- One Admin can multiple payment at a time
- One Admin can views multiple order
- One Admin can edit/add multiple events

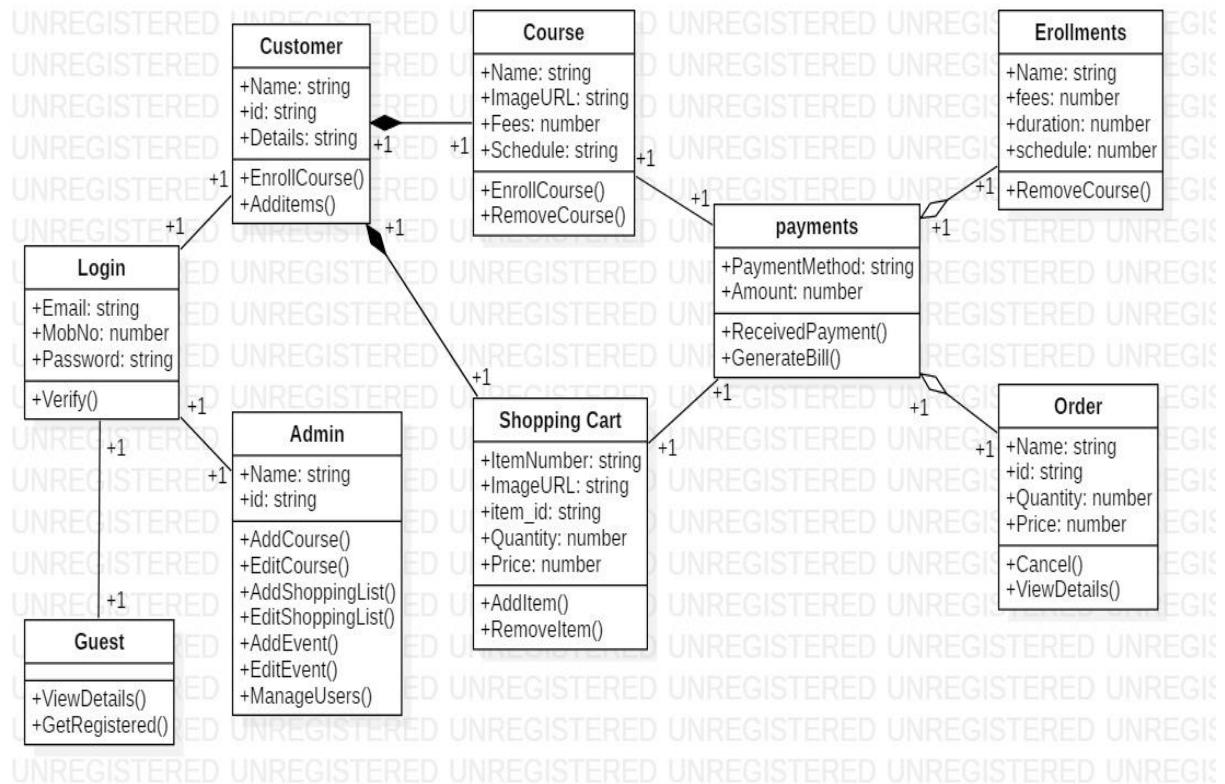

5. Class diagram:

Class diagram is a static diagram .it represents the static view of an application .class diagram shows collection of classes ,interface ,association ,collaboration and constraints .it is also known as a structural diagram.

In the diagram, classes are represented with boxes that contain three compartments:

- The top compartment contains the name of the class.
- The middle compartment contains the attributes of the class.
- The bottom compartment contains the operations the class can execute.

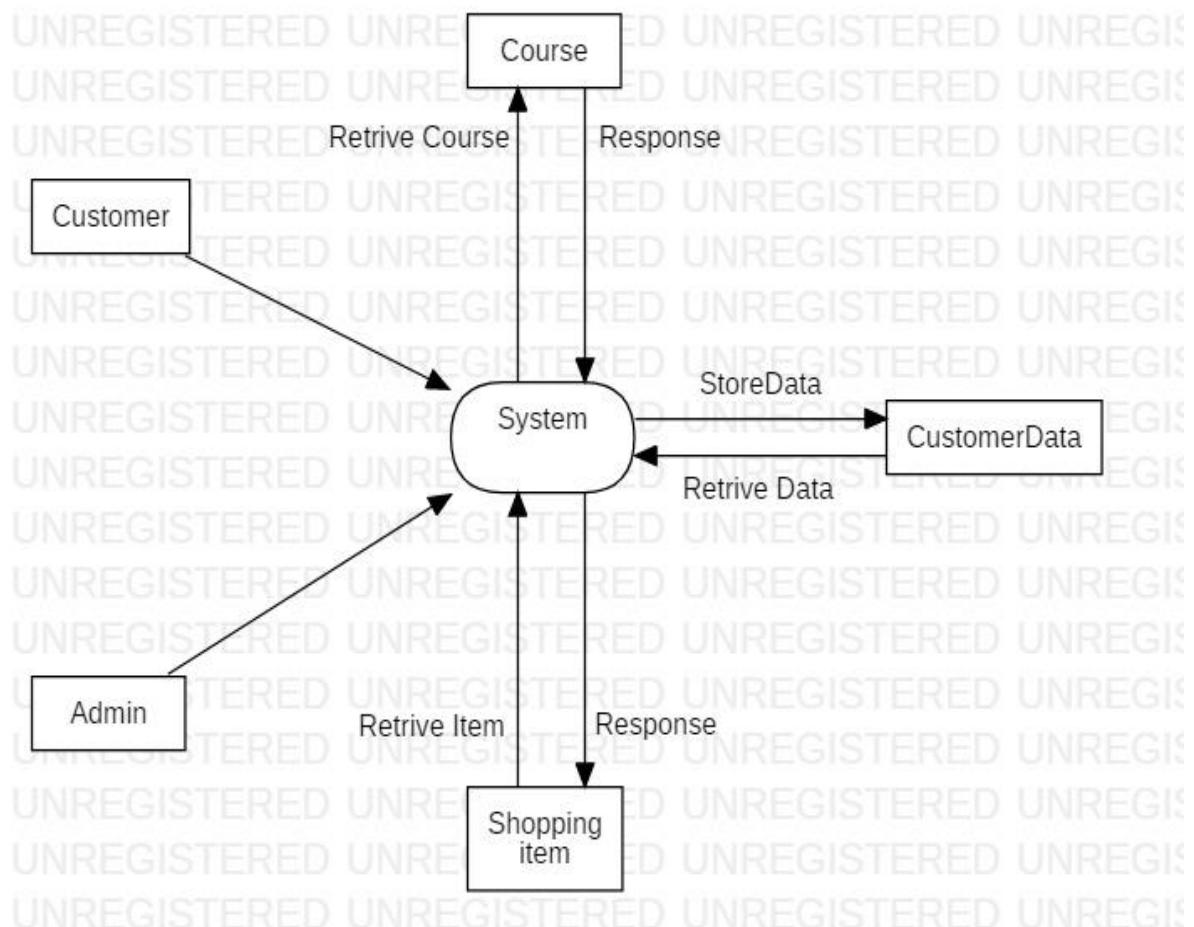

6 Data Flow Diagram:

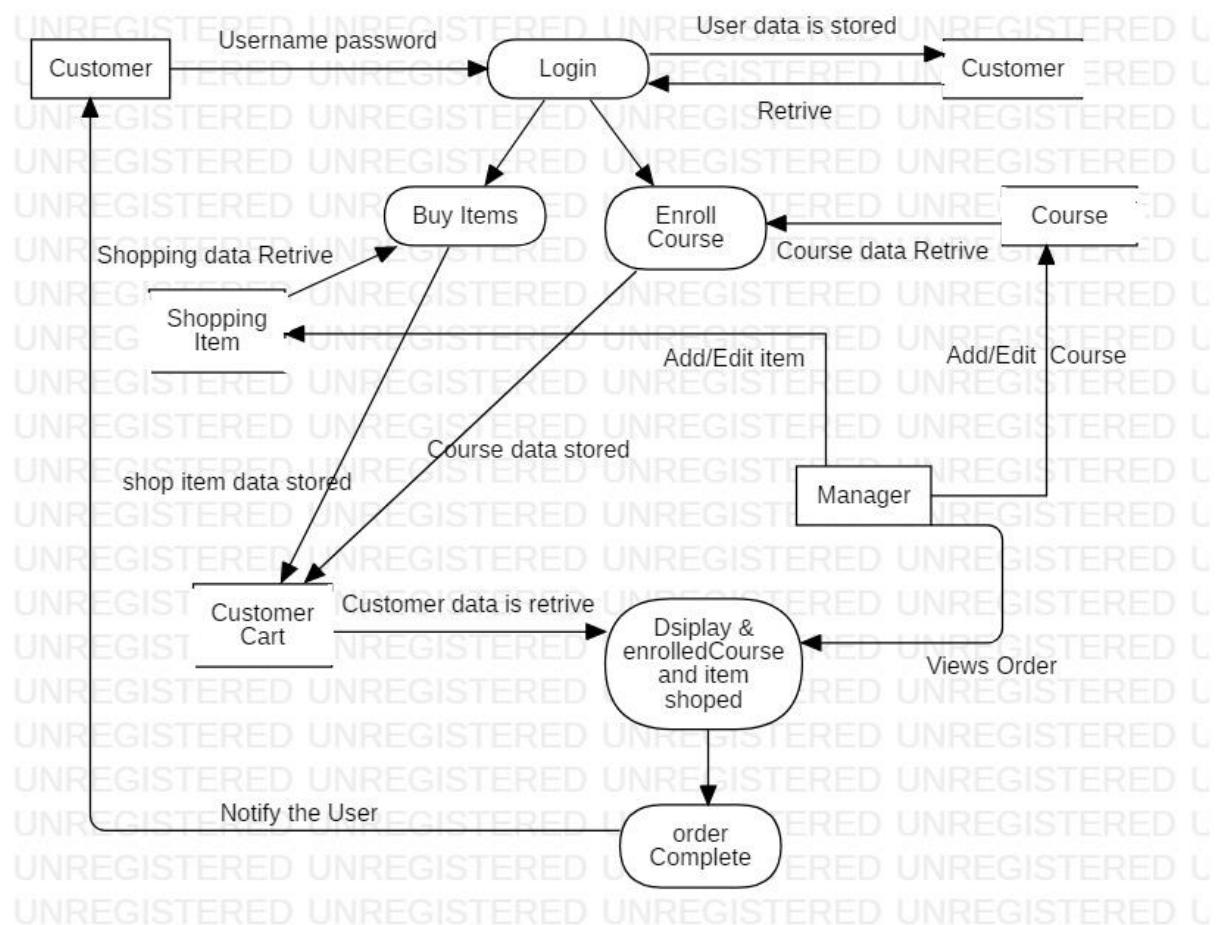

A data flow diagram (DFD) illustrates how data is processed by a system in terms of inputs and outputs. As its name indicates its focus is on the flow of information, where data comes from, where it goes and how it gets stored.

A general overview of system is represented with a context diagram also known as a level 0 DFD which shows a system

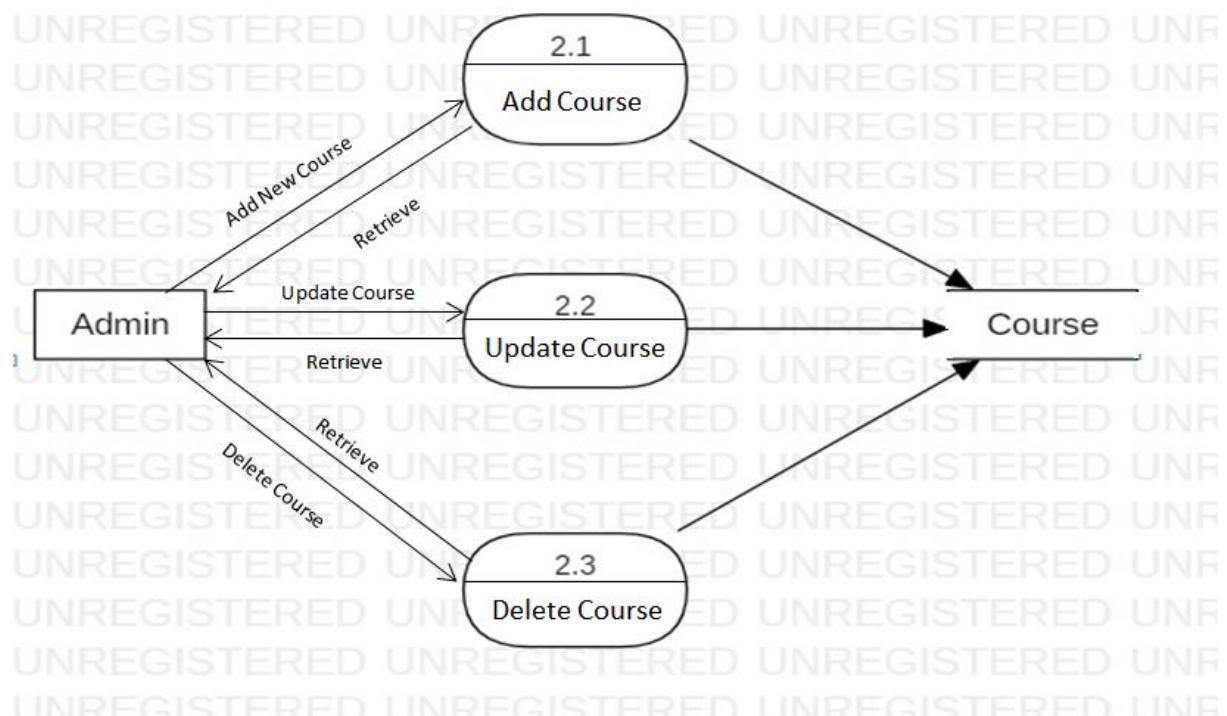

LEVEL 0:

CHAPTER 4

SYSTEM DESIGN

4.1 User Interface:

1. Home page:

The screenshot shows a website header with the logo 'ASANA' and a navigation bar with links for HOME, CLASS, SHOP, ABOUT, BLOG, and CONTACT. The main content area features a large, bold text 'DO YOU PRACTICE AND ALL IS COMMING' with left and right arrows on either side. Below this is a 'Learn More' button.

2. Class page:

The screenshot shows a website header with the logo 'ASANA' and a navigation bar with links for HOME, CLASS, SHOP, ABOUT, BLOG, and CONTACT. The main content area includes a photograph of a person's hands rolling up a yoga mat. To the right, there is descriptive text about the class, including 'Rhythm and routine', 'Time: Monday-Wednesday 8.30am-9.30am', and 'Instructor: Nilesh shinde'. A 'Enroll Now' button is located at the bottom right. Navigation buttons for '1', '2', and 'Next' are also present.

Our Story:

Our studio presents yoga as technique of controlling the body and the mind well be happy to share our knowledge with you.

Yoga is physical ,mental and spiritual practice or discipline which originated in India

4.2 Pseudo Code:

Customers:

```
Begin
If (user has signed in) then
{
Customer can view course, enroll course, Buy items and see Upcoming events.
}
Else
{
If (user is registered) then
{
Sign In
}
Else
{
Sign up
}
}
```

Admin:

```
Begin
Login In
If (authorized) then
{
Login Successful
Admin can Add Course, Add shopping item, Add events, view user details.
}
Else
{
If (unauthorized) then
{
Invalid
}
}
```

4.3 System Testing:

This includes multiple software testing types that will enable to validate the software as a whole (software, hardware, and network) against the requirements for which it was built. Different types of tests GUI testing, Functional testing, Regression testing, Smoke testing, load testing, stress testing, security testing, stress testing, ad-hoc testing etc. are carried out to complete system testing.

Black Box Testing:

Black Box Testing is a software testing method in which the internal structure of the item is being tested is not known to the tester. These tests can be functional or non-functional. This method is named so because the software program, in the eyes of the tester is like a black box, inside which one cannot see. This method attempts to find errors.

White Box Testing:

White box testing is the testing of the internal workings or code of a software application. System test involves the external workings of the software from the user's perspective. White box testing is testing beyond the user interface and into the nitty-gritty of a system.

Unit Testing:

Unit testing is a type of testing that is performed by software developers. Unit testing follows white box testing approach where a developer will test units of source code like statements, branches, functions, methods, and interface in OOP. Unit testing usually involves in developing stubs and drivers. Unit tests are ideal candidates for automation. Automated tests can run as Unit regression tests on new builds or new versions of the software.

Module Testing:

Module testing is defined as a software testing type, which checks individual subprograms, subroutines, classes, or procedures in a program. Instead of testing whole software program at once, module testing recommends testing the smaller building blocks of the program. Module testing is largely a white box oriented. The objective of doing Module testing is not to demonstrate proper functioning of the module but to demonstrate the presence of an error in the module.

Integration Testing:

Integration testing is one of the most common and important types of software testing. Once the individual units or components are tested by developers as working then testing team will run tests that will test the connectivity among these units/component or multiple units/components.

Functional Testing:

Functional testing is a formal type of testing performed by testers. Functional testing focuses on testing software against design document, Use cases, and requirements document. Functional testing is a black box type of testing and does not require internal working of the software, unlike white box testing.

GUI (Graphical User Interface) Testing:

This type of software testing is aimed at testing the software GUI (Graphical User Interface) of the software meets the requirements as mentioned in the GUI mock up and Detailed designed documents. For e.g. checking the length and capacity of the input fields provided on the form, type of input field provided, some of the form fields can be displayed as drop-down box or a set of radio buttons.

So GUI testing ensures GUI elements of the software are as per approved GUI mock ups detailed design documents, and functional requirements.

CHAPTER 5

IMPLEMENTATION AND TESTING

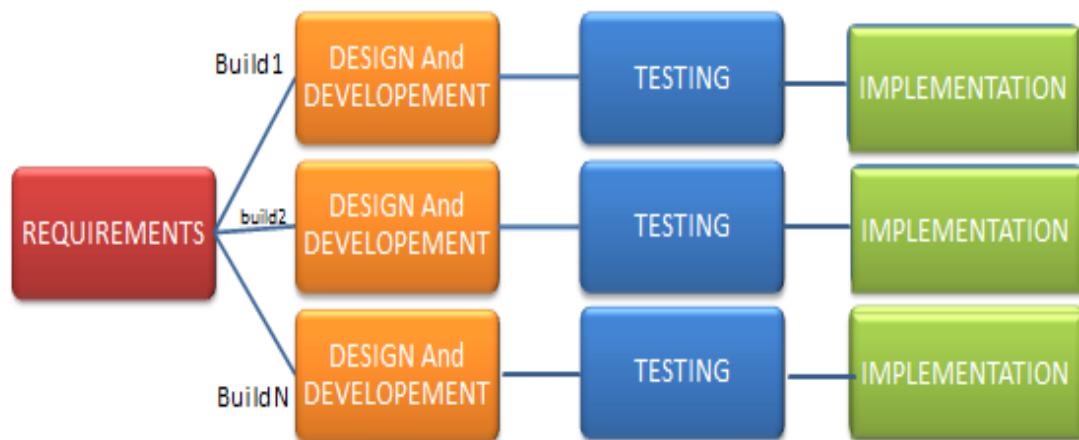

5.1 Implementation Approach:

The implementation was done with *incremental build approach*. It is combination of iterative and incremental development models.

The incremental build model is a method of software development where the product is designed, implemented and tested incrementally (a little more is added each time) until the product is finished.

The iterative model starts with implementing few functionalities of the software at the beginning. Then as number of iterations is performed, new functionalities are added with each iteration. The main idea is to develop a system with repeated cycles and small portions of system at a time.

The following diagram shows iterative & incremental model –

In this approach, requirements are divided into smaller builds with each build creating a new module. The module goes through all the phases – Design, Test, Implement etc. and is finally added as new functionality in the existing system at the end of every build.

Requirements for the project are the documents, features or modules. Analysis of the project is done through checking the requirements. Design for the project starts from Home Page, Login page and Registration page wherein code is implemented for each screen. After completing the coding phase then comes the testing phase wherein the code is tested to

identify and locate any potential bugs or issues that may have been in the project. So code is tested through building, running or debugging the application. Once the testing is done again comes the designing part for the other modules that is the Camp page and the book Store page Again testing phase and implementation phase. The designing part for the contact page is designed then code is implemented and code is tested. The designing part for the About Us page is designed then code is tested and code is implemented

After this, I Started Designing, testing and implementation for Admin Interface. First started with Admin Camp page and Admin Books Page Once the designing , testing is done again comes the designing part for the other modules that is the Camp Enrollment page and Book Order page wherein design for the screen is done and code is implemented and tested.

5.2 Code Details and Code Efficiency:

Login.html

```
<Html>
<Head>
<Title>Login Form Design</title>
<link rel="stylesheet" type="text/css" href="../css/styleLogin.css"></head>

<body>

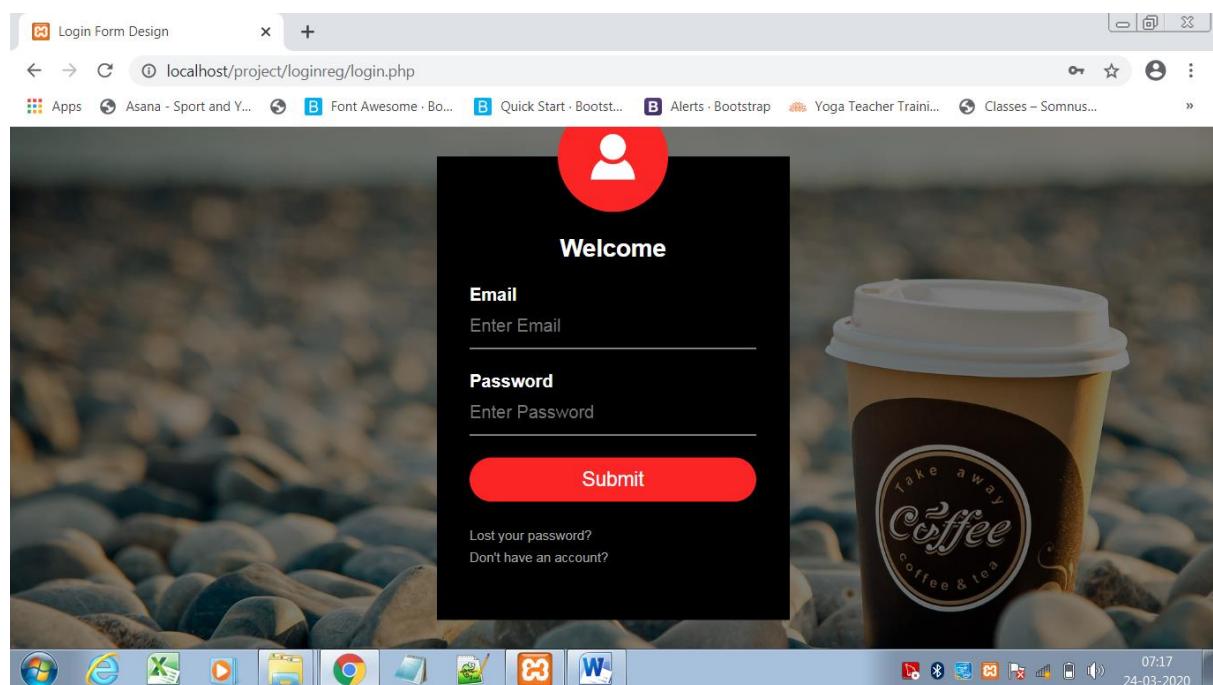

<div class="loginbox">

<h1>Welcome</h1>
<form method="post" action="insertQuery.php" >

    <p>Email</p>
    <input type="text" name="email" placeholder="Enter Email" />
    <p>Password</p>
    <input type="password" name="password1" placeholder="Enter Password" />

    <input type="submit" name="submit" />
    <a href="register.php">Don't have an account?</a>

</form>
</div>
</body>
</head>
</html>
```

Code for Downloading payment Slip or Enrolment form :

```
<html>
<head>
</head>
<body>
<button type="button" class="btn btn-primary" onclick="myFunction()" >
Print Acknowledgement </button>
<script>
function myFunction()
{
window.print();
}
</script>
</body>
</html>
```

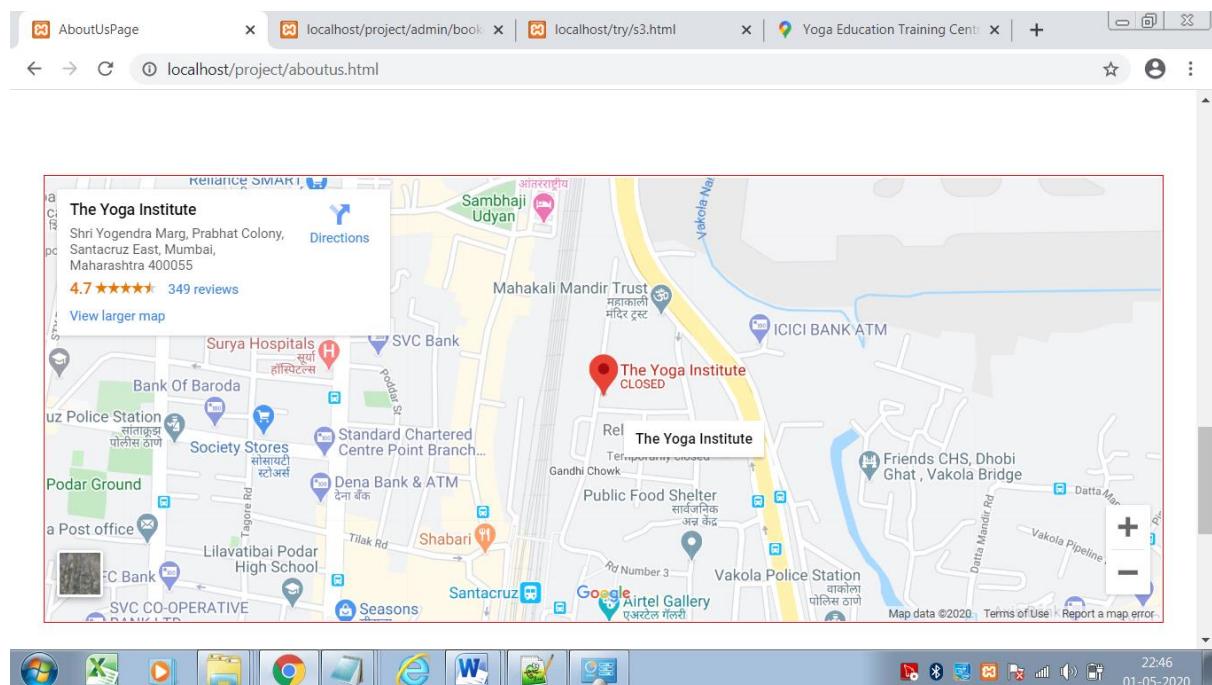

Code to include Map Location :

```
<div class="map">  
  
<iframe src =  
"https://www.google.com/maps/embed?pb=!1m18!1m12!1m3!1d3770.513774211695!2d72.  
84096431317919!3d19.085103987082675!2m3!1f0!2f0!3f0!3m2!1i1024!2i768!4f13.1!3m3!  
1m2!1s0x3be7c9a916aaaaab%3A0xb1b1dc9c91cb9a!2sThe%20Yoga%20Institute!5e0!3m  
2!1sen!2sin!4v1579371725773!5m2!1sen!2sin" // Location  
width="100%" height="400" frameborder="0" style="border:0;" ></iframe>  
  
</div>
```

To include iframe from google map :

- First search the location then click on share after that click on embed map and copy the html link .

Output :

Code Sending Email from web page :

```
<form method="post" action="contact.php">
<div class="pad">
<input type="text" class="form-control" placeholder="Your Name" name="name"
required /><br>

<input type="email" class="form-control" placeholder="Email id" name="mailid"
required /><br>

<input type="text" class="form-control" placeholder="Subject" name="subject"
required /><br>

<textarea class="form-control" rows="8" placeholder="Your Message" name="txt"
required /></textarea></div><br>

<button type="submit" name="email" value="ok" class="btn btn-primary">
Send Message</button>
</div>
</form >

<div class="text-center">
<?php
if(isset($_POST['email'],$_POST["name"] ,$_POST["subject"] ,$_POST["txt"] )){

$to_email="yogaeducation45@example.com";
$subject= $_POST["subject"];
,$mailBody=$_POST["txt"];
$headers = "From : ".$_POST['email'];

if (mail($to_email, $subject, $mailBody, $headers)) {
?><div class="text-center">
<h4 style="color:green;">Email successfully sent to yogaeducation45@gmail.com
</h4></div><?php
}
else {
?><div class="text-center">
<h4 style="color:red;">Email sending failed...</h4></div><?php
}
?
?></div>
```

Output :

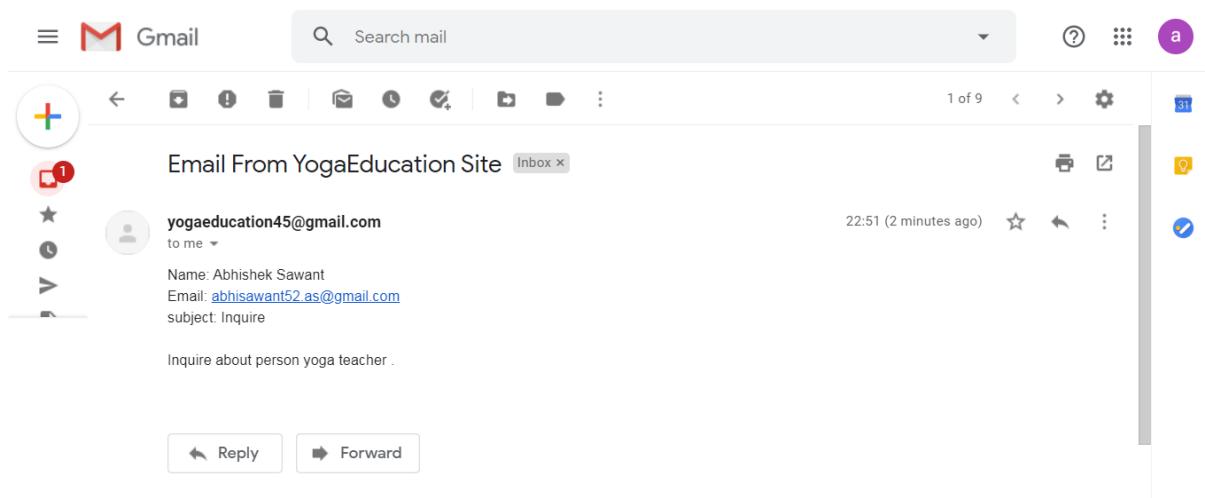

Send Us a Message
Ask Query

We love to meet people and talk about possibilities

Send Message

Email successfully sent to yogaeducation45@gmail.com

Gmail Account

The screenshot shows a Gmail inbox with one unread email. The email is from "Email From YogaEducation Site" and is addressed to "yogaeducation45@gmail.com". The subject line is "Inquire". The message body contains the text "Inquire about person yoga teacher .". The Gmail interface includes standard controls like reply, forward, and delete.

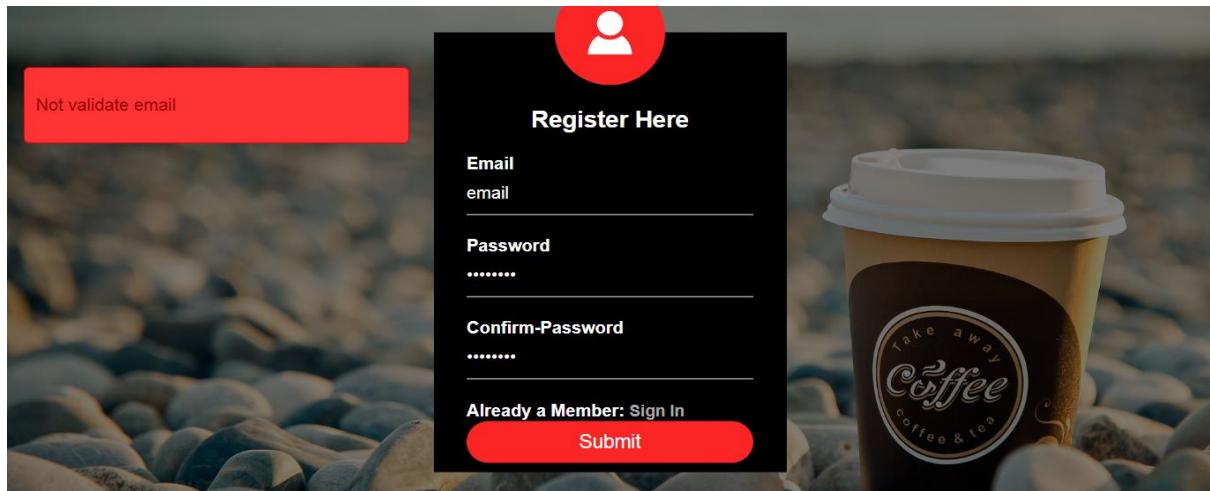

5.3 Testing Approach:

5.3.1 Unit Testing

In this I am test an individual unit or groups of inter related units. It is often done by programmer by using sample input and observing its corresponding outputs.

I have performed unit testing at the end of each iteration. Required field validator for each text box. Unit Testing is done regularly.

For Example: Here for email field has have place required field validation and email validation. If user enter wrong email id it should display not a valid email message.

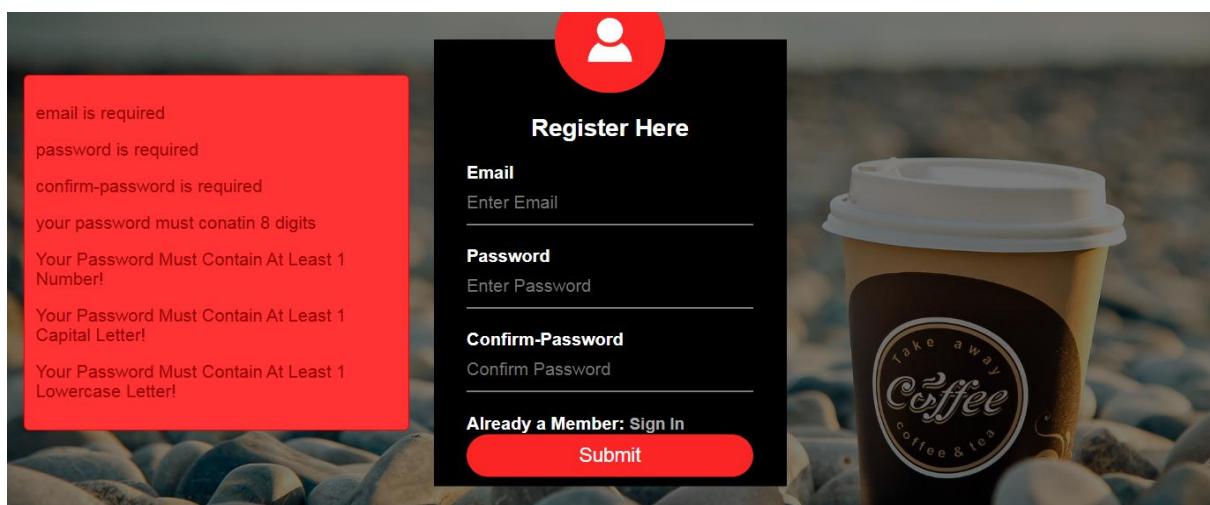

5.3.2 Module Testing:

Instead of testing whole software program at once, In Module testing I am testing program in smaller building blocks.

I have performed module testing at the end of each iteration. After testing the units independently, modules are tested through input value which does some processing and generates output. The outputs are validated against the expected feature.

For example: here I have tested email password and confirm password as whole Login module.

5.3.3 Integration Testing:

I have performed Integration testing to ensure that no components conflict to each other. Design and functionalities of all modules in integration is tested. Here I have test the connectivity among these units/module.

For example: if registration is successful then user is redirecting to login page.

5.3.4 System Testing

Module was again integrated to make complete system. Tested everything as a system and tried using system from different user perspective. Took peer review and asked people to test system pretending to be specific user of this system. System testing is level of software testing where a complete and integrated software is tested. Usually black box type of testing is used in System testing.

5.3.5 Graphical User Interface Testing

GUI testing technique in which the application's user interface is tested whether the application performs as expected with respect to user interface behavior. GUI Testing includes the application behaviour towards keyboard and mouse movements and how different GUI objects such as toolbars, buttons, menu bars, dialog boxes, edit fields, lists, behaviour to the user input.

The GUI of our project is very vibrant and colour full. The Font size and colours is kept in the contrast to each other the GUI is kept simple for easy user friendly experience. The validation errors is shown in red colours . The controls used like drop down list and button is used for easy click to go output. Overall there are some minor changes need to be done and GUI works perfectly fine.

5.4 MODIFICATION AND IMPROVEMENTS:

- There was an error on registration screen, when user clicks on Sign In button, page was not redirection on Login page , after changing the URL, error was solved . Improvements were done retesting.
- For displaying Book items, I was declaring wrong database name wherein data was not available, improvements were done after recoding and retesting.
- Error for inserting camp Course wherein I was declaring a wrong variable type, after changing the variable type database error was solved.
- For products, I am manually assigning value to product id. It was creating a little confusion for the Admin whether id is available or already in use. So I added Auto Increment for product id so that product id will automatically update when admin insert product.

5.5 TEST CASES:

For login & registration Page:

Sr NO.	Test Cases Description	Expected Result
TC01	Correct Email and password	The HOME screen should be displayed
TC02	Incorrect email and password	Message displaying Incorrect username and password should be displayed.
TC03	Incorrect email and correct password	Message displaying Incorrect username and password should be displayed.
TC04	Correct email and incorrect password	Message displaying Incorrect username and password should be displayed.
TC05	Empty email and password	Message displaying email and password is required.
TC06	Empty password field	Message displaying password is required.
TC07	Empty email field	Message displaying email is required.
TC08	Incorrect Email	Message displaying not a valid email.
TC09	Password containing less than 8 character	Message displaying password must contain 8 characters.
TC10	Password not containing Capital letter	Message displaying password must contain at least one capital letter
TC11	Password not containing Lowercase letter	Message displaying password must contain at least one lowercase letter
TC12	Different confirm password	Message displaying passwords do not match.

For Camp & Book Page:

Sr No.	Test Cases Description	Expected Result
TC13	To Check Whether No field is kept empty	Display message "This field required "
TC14	Name & Surname Field Allow only alphabets	Display message "please match requested format"
TC15	Contact Field Allow only digit	Display message "please match requested format"
TC16	Contact Field Allow Only 10 digit	Display message "please match requested format"
TC17	Zip code Allow Only 10 digit	Display message "please match requested format"
TC18	Allow only 12+ age	Display message " value should be Greater than 12"
TC19	Allow only valid email format	Display message " please enter valid email"
TC20	Without Login Enrolling or Adding item to cart	Display message Login First.
T21	Add book to cart	Book item should add to cart list
T22	Enroll camp	Should redirect to camp form

Chapter 6

Results And Discussion

6.1 TEST REPORTS:

(for login and register screen)

Sr NO.	Test Cases Description	Expected Result	Actual result	status
TC01	Correct Email and password	The HOME screen should be displayed	Same as expected	PASS
TC02	Incorrect email and password	Message displaying Incorrect username and password should be displayed.	Same as expected	PASS
TC03	Incorrect email and correct password	Message displaying Incorrect username and password should be displayed.	Same as expected	PASS
TC04	Correct email and incorrect password	Message displaying Incorrect username and password should be displayed.	Same as expected	PASS
TC05	Empty email and password	Message displaying email and password is required.	Same as expected	PASS
TC06	Empty password field	Message displaying password is required.	Same as expected	PASS
TC07	Empty email field	Message displaying email is required.	Same as expected	PASS
TC08	Incorrect Email	Message displaying not a valid email.	Same as expected	PASS
TC09	Password containing less than 8 character	Message displaying password must contain 8 characters.	Same as expected	PASS
TC10	Password not containing Capital letter	Message displaying password must contain at least one capital letter	Same as expected	PASS
TC11	Password not containing Lowercase letter	Message displaying password must contain at least one lowercase letter	Same as expected	PASS
TC12	Different confirm password	Message displaying passwords do not match.	Same as expected	PASS

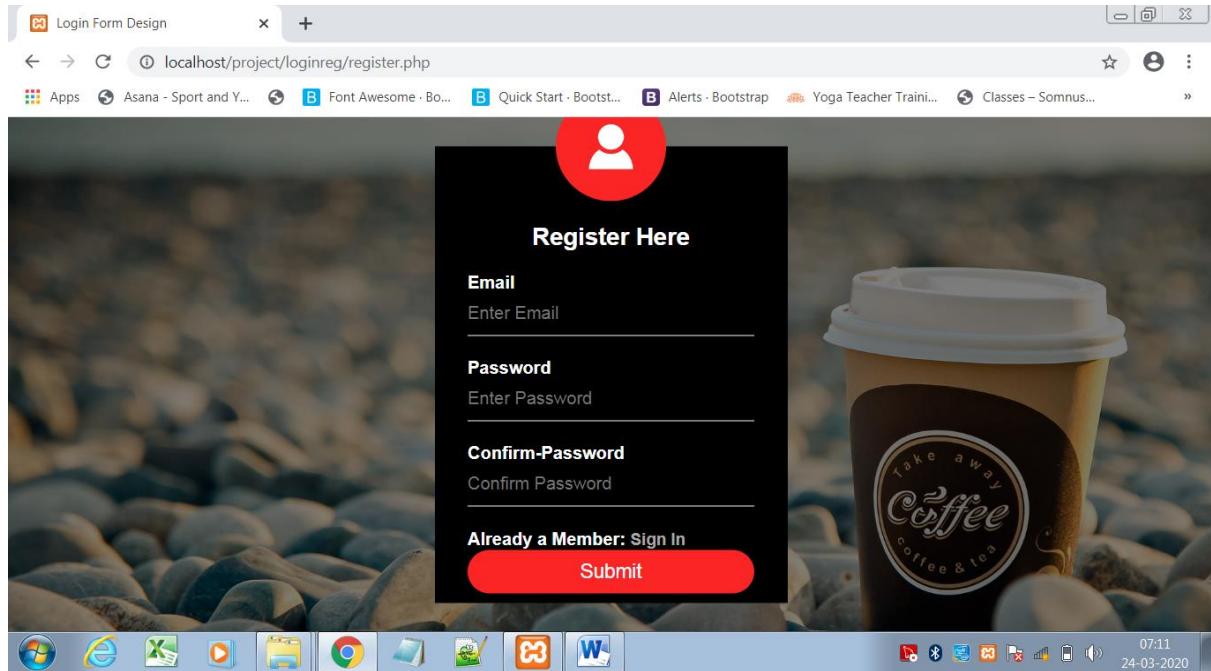

(For Camp & Book Page)

Sr No.	Test Cases Description	Expected Result	Actual Result	Status
TC13	To Check Whether No field is kept empty	Display message "This field required "	Same as expected	PASS
TC14	Name & Surname Field Allow only alphabets	Display message "please match requested format"	Same as expected	PASS
TC15	Contact Field Allow only digit	Display message "please match requested format"	Same as expected	PASS
TC16	Contact Field Allow Only 10 digit	Display message "please match requested format"	Same as expected	PASS
TC17	Zip code Allow Only 10 digit	Display message "please match requested format"	Same as expected	PASS
TC18	Allow only 12+ age	Display message " value should be Greater than 12"	Same as expected	PASS
TC19	Allow only valid email format	Display message " please enter valid email"	Same as expected	PASS
TC20	Without Login Enrolling or Adding item to cart	Display message Login First.	Same as expected	PASS
T21	Add book to cart	Book item should add to cart list	Same as expected	PASS
T22	Enroll camp	Should redirect to camp form	Same as expected	PASS

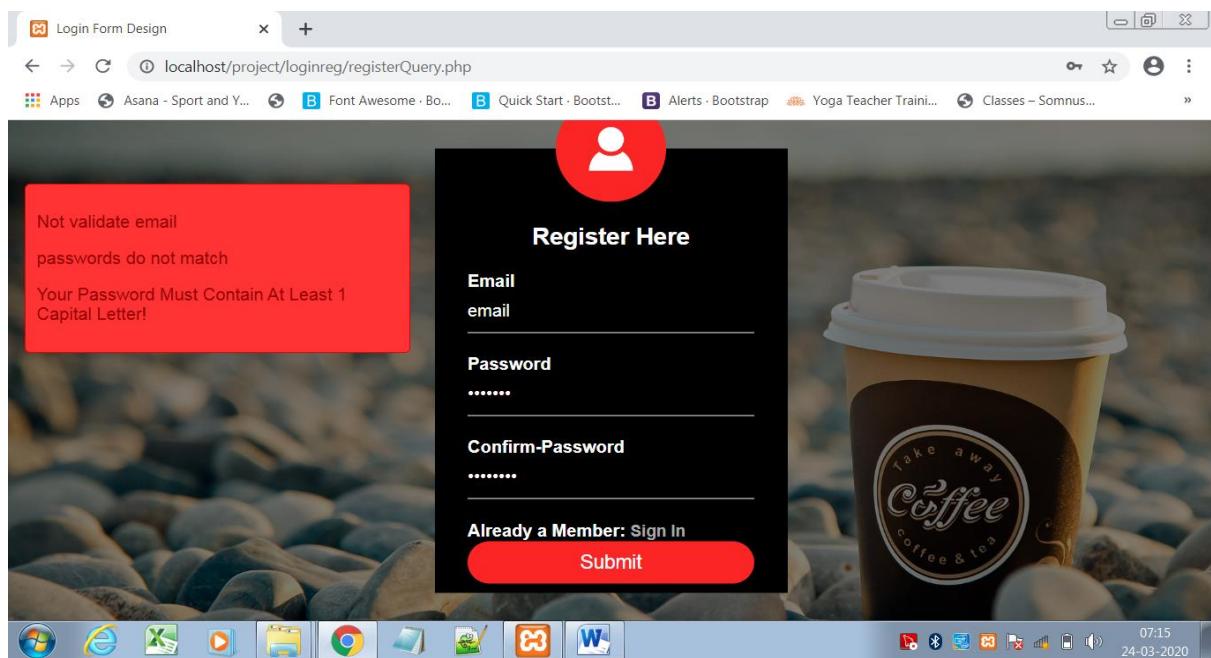

6.2USER DOCUMENTATION:

User Interface:

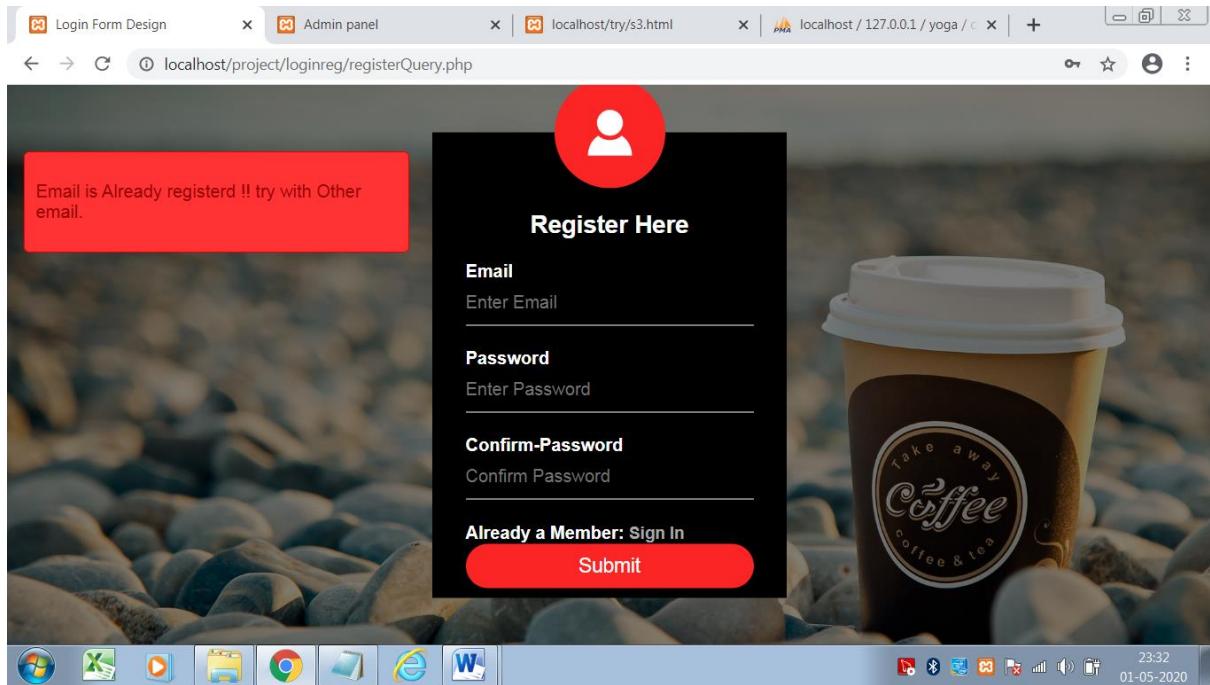

Registration Page:

If user enters incorrect email and password then it will display Errors.

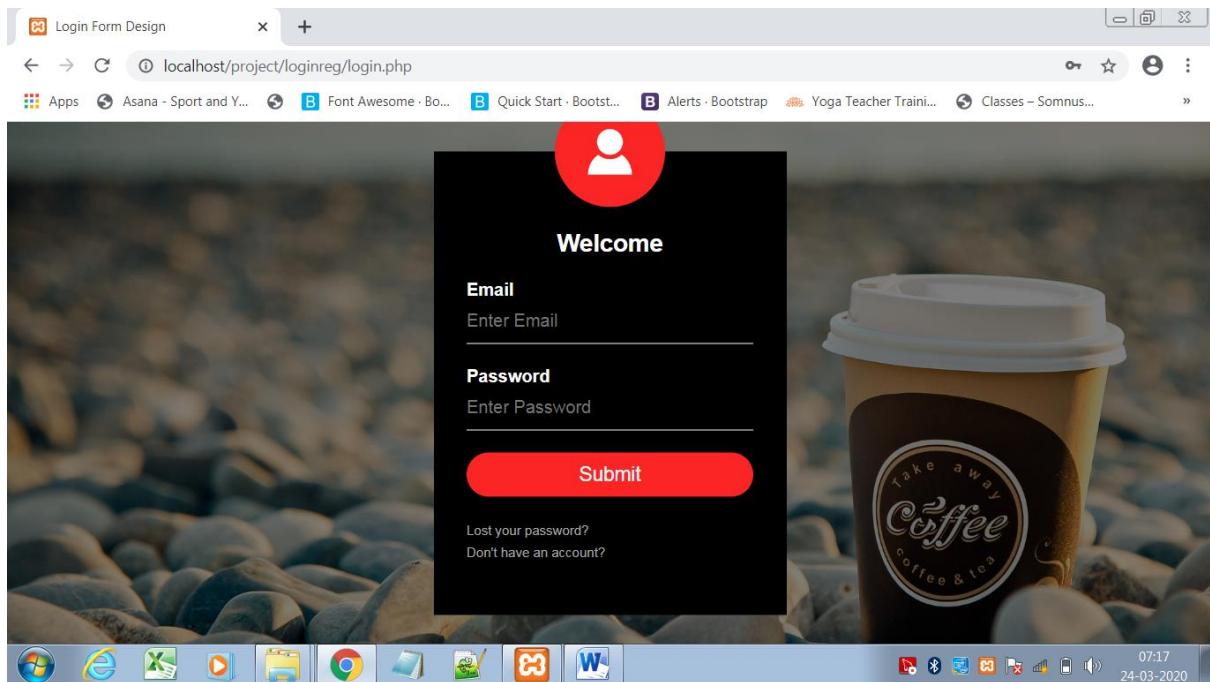

If user is trying to register with already register email then it will display error message as “ Email is Already Registered !! try with Other email .”

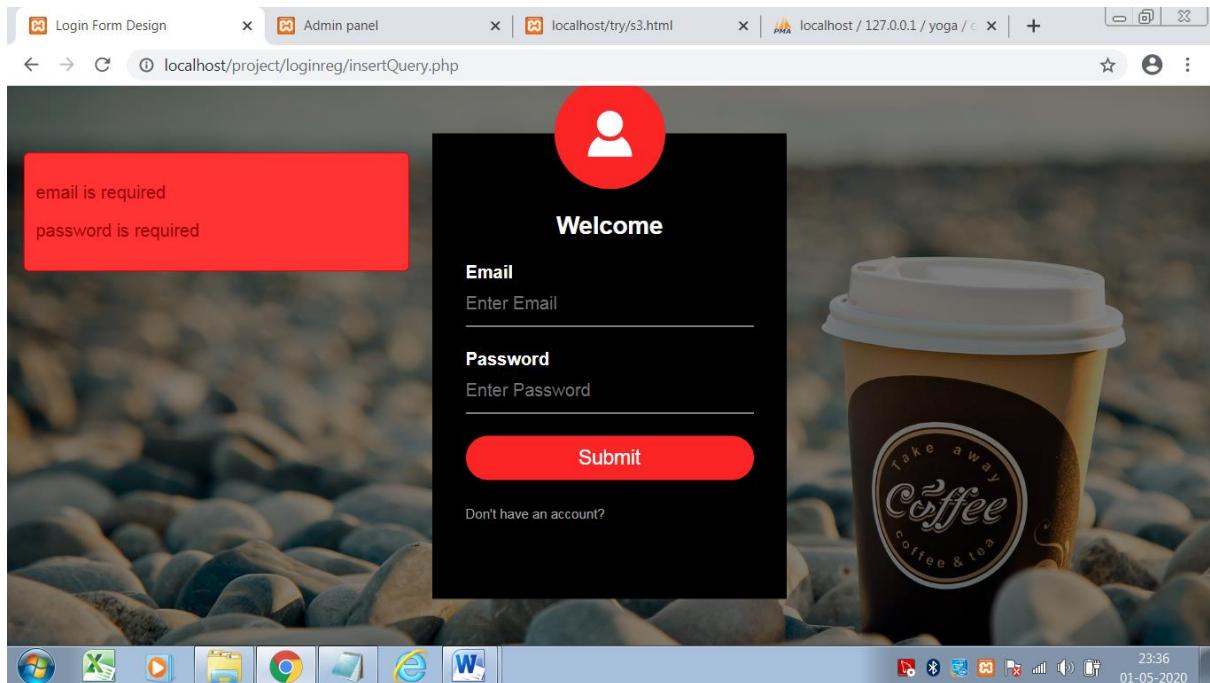

If all the details are correct then user registration will be successful and user will direct to login page.

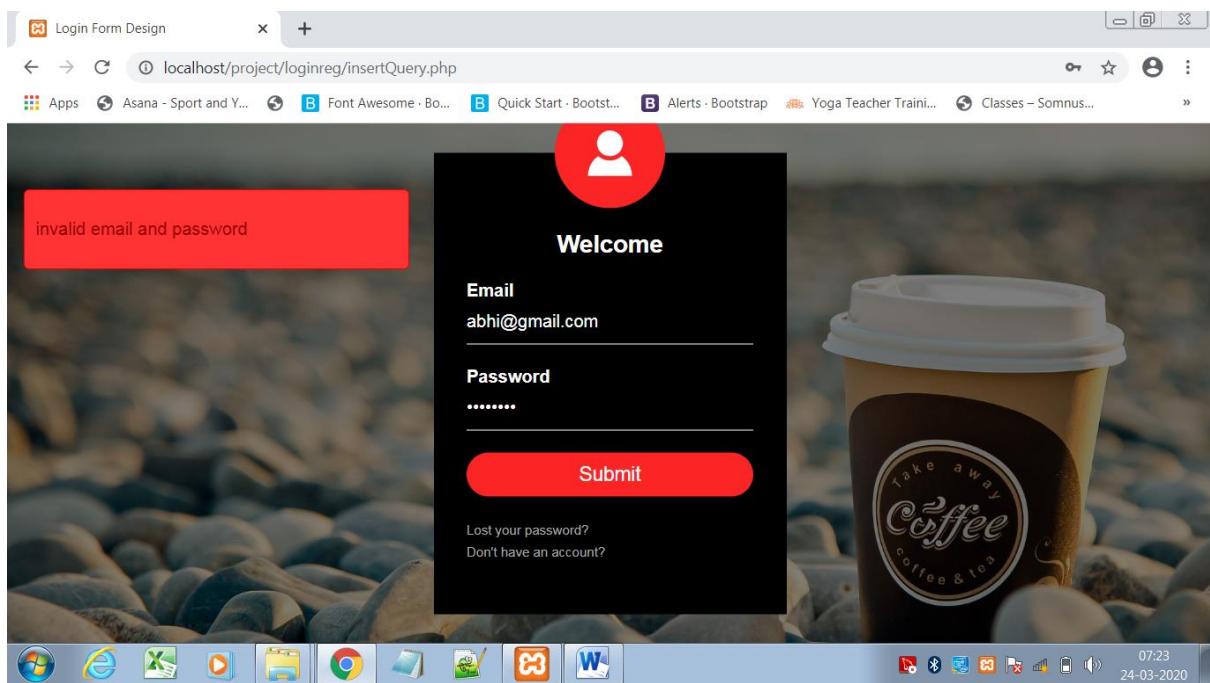

Login page:

If user try's to login without email and password it will display error email and password is required.

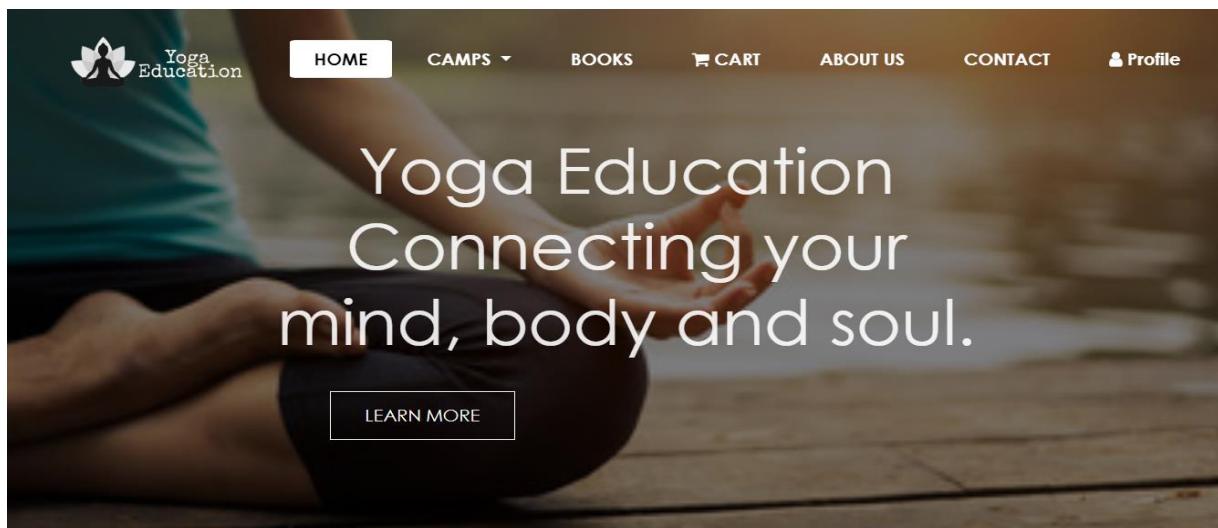

If users enter wrong email and correct password or vice-versa. It will display invalid email and password.

If user enters correct email and password then he will redirect to home page of yoga website.

Home Page:

Home page is linked to different pages of website.

If user click One Month TTC (teacher training course) it will redirect to Preview page Where we are passing session value as one Month TTC and On preview page I am retrieving information about that session.

The screenshot shows the website's header with a logo of a person in a meditative pose, followed by "Yoga Education". The navigation menu includes links for HOME, CAMPS (with a dropdown arrow), BOOKS, CART, ABOUT US, CONTACT, and Profile. Below the header, the main title is "One Month Yoga Teachers' Training Course (One Month TTC) (English/Hindi)". A horizontal line separates the title from the content area. In the content area, there are four tabs: "Programme Details" (selected), "Course Syllabus" (highlighted in blue), "Course Duration & Registration", and "Terms & Condition". The "Programme Details" tab contains text describing the course as a basic certificate course for teaching Yoga techniques to healthy adults. It highlights the theoretical and practical aspects of Yoga, including experiential learning of unique techniques and concepts. The "Course Syllabus" tab contains text about the Classical Ashtanga Yoga Syllabus, mentioning core principles and philosophical foundations. The "Course Duration & Registration" tab contains text about the course duration and registration process. The "Terms & Condition" tab contains text about the terms and conditions of the course. At the bottom of the page, there is a footer section with the "Yoga Education" logo, contact info (Mobile: +91 7678065764, Email: yogaeducation45@gmail.com, FOR ANY ASSISTANCE: 022-6109-4444), office hours (7.30Am to 7.00Pm (Mon To Sat), 7.30Am to 5.00Pm (Sunday), Center hours as per Class schedule), social media links (Facebook, Twitter, Instagram, YouTube), and a copyright notice (Copyright © 2018.YogaEducation All rights reserved). There is also a small upward-pointing arrow icon in the footer.

Programme Details

The One Month TTC is basic certificate course which prepares students for teaching Yoga techniques to normal healthy adults.

The course covers theoretical and practical aspects of Yoga. The syllabus also consists of experiential learning of unique techniques & concepts pioneered by the founders of our Institute.

Classical Ashtanga Yoga Syllabus – The comprehensive course covers core principles and philosophical foundations of traditional Yoga.

Ideal for Yoga novices it covers an introduction to the study of Patanjali's Yoga Sutra, Hatha Yoga Pradipika and Gheranda Samhita. Further, complete immersion into practical experiences of the principal Yoga asanas, pranayamas, Kiryas, concept studies, public speaking, the methodology of teaching etc. are covered. The Yoga Institute pioneered techniques and Bhavas. Detailed anatomy and physiology classes conducted by Yoga experts will cover theory and practice.

This page will provide information about Programme detail, Course syllabus, course duration & Registration, Terms & conditions.

On Course Duration & Registration tab , if user click on Enroll course button it will redirect user to camp Form.

The screenshot shows a course registration form. At the top, there are tabs: Programme Details, Course Syllabus, Course Duration & Registration (which is selected), and Terms & Condition. Below the tabs, the 'Duration:' section states '1 month - starts on the 1st day of every month.' The 'Timing:' section includes 'Monday to Saturday, 10:00 a.m. - 6:00 p.m.' and 'All participants are required to attend at least one Satsang on Sunday between 9.30 am to 10.30 am.' It also specifies 'Open to all. Minimum age 18 years.' The 'Price:' is listed as ₹27000. The 'Starting Dates:' section lists 'Date : 2020-05-02' and 'Date : 2020-06-01'. A green 'Enroll Course' button is located at the bottom left of the form area.

If user is already logged-In then it will display camp form, if not then it will display message 'Please Login First' message is link to login page .

The screenshot shows a camp form page. At the top, there is a navigation bar with a logo, 'Yoga Education', and links for HOME, CAMPS, BOOKS, CART, ABOUT US, CONTACT, and Profile. The main title is 'Camp Form' in orange, followed by a red message 'Please Login First'. Below this, there is a large dark banner with the 'Yoga Education' logo. The footer contains three columns: 'Contact Info' with mobile and email details, 'Office Hours' with operating times, and 'Social Media' links for Facebook, Twitter, Instagram, and YouTube. At the very bottom, a copyright notice reads 'Copyright @ 2018.YogaEducation All rights reserved'.

User can select joining date from dropdown list . If user click on make payment button and all fields are correctly fill then it will redirect user to payment page.

If bank Transaction is failed then it will display message transaction is failed.

If bank Transaction is successful then it will display message Transaction status is successful.

The screenshot shows a web browser window with the URL `localhost/project/camps/ttc/payment/pgResponse.php`. The page title is "Camp Enrollment details:". On the right side, there is a logo for "Yoga Education". A green box highlights the message "Transaction status is success". Below this, under "Student details:", there is information about a student named ABHISHEK SAWANT, including gender (male), date of birth (1999-07-01), age (21), address (1/h parle products pvt ltd, v.s khandekar marg vileparle e, MUMBAI MAHARASHTRA, ZipCode:400057 INDIA), contact details (Email: abhisawant52.as@gmail.com, Mobile No: 7678065764), and payment details (Bank Name: Bank, BANKTXN ID: 777001246579280). Under "Payment Info:", transaction details are listed: order Id = ORDS99434001, PAYTM_MERCHANT_MID = gcPava98830569881679, Transaction ID = 20200324111212800110168588501368500, Transaction STATUS = TXN_SUCCESS, Transaction Amount = 27000.00, CURRENCY = INR, Transaction Date = 2020-03-24 00:32:51.0, PAYMENT MODE = DC. At the bottom right, there is a link to "Back to Home Page".

Joining date is 02-05-2020 and User enrolling one month TTC course so that it will show expiry date as 02-06-2020.

And user has done payment through debit card so payment mode is showing as DC(debit card).

If user want to save the document in PDF format , he can print the document by clicking on Print Acknowledgement button.

The screenshot shows a print dialog box overlaid on a web browser window. The browser window displays the same "Camp Enrollment details" page as the previous screenshot. The print dialog has "Save as PDF" selected as the destination. Other options include "All" pages, "1 page", "Default" margins, and checkboxes for "Headers and footers" and "Background graphics". At the bottom right of the dialog are "Save" and "Cancel" buttons. The status bar at the bottom of the screen shows the email address "Email: abhisawant52.as@gmail.com" and the text "BANK NAME =Bank".

Special Course:

The screenshot shows a website for 'Yoga Education'. At the top, there is a navigation bar with links: HOME, CAMPS ▾, BOOKS, CART, ABOUT US, CONTACT, and a Profile icon. The main banner features a woman in a black dress meditating in a lotus pose, with the text 'Special Courses' overlaid.

Meditation Camp

No other movement in recent years has so fascinated people as the possibility of calming the mind through meditation. All the techniques of classic yoga of Patanjali aim at making one more aware and finally to see the Self shining forth in its own true nature.

Simple guidelines are offered in this meditation camp to see how meditation can lead to a meditative state the whole day aiding in efficiency in work and in life and living. Recent research has proved that meditating regularly change the brain waves for the better.

If user click on preview button he can preview the full page description of book.

The screenshot shows a product page for a book titled "Yoga For All" by Smt. Hansaji. The book cover features a silhouette of a person in a yoga pose against an orange background. Text on the cover includes "Foreword by AMITABH BACHCHAN", "YOGA FOR ALL", "Discovering the true essence of yoga", and "Hansaji J. Yogendra". The page has a header with navigation links: HOME, CAMPS, BOOKS (which is highlighted), CART, ABOUT US, CONTACT, and Profile. To the right of the book image, the title "Yoga For All by Smt. Hansaji" is displayed. Below the title is a detailed description of the book: "Often, Yoga is equated with the physical practices such as asanas, pranayamas and kriyas, but in Yoga for All, Hansaji revisits the idea of yoga and presents it in an all-inclusive role where the person is considered in totality. The book brings forth the joy, freshness and wholesomeness of yoga, and repositions the traditional techniques of yoga in a new and unique dimension. This approach and techniques are taught at the Institute and has benefited its disciples, including renowned celebrities. Number of Pages – 276 Weight – Grams". Below the description are two buttons: "Qty: Add To Cart".

User can Buy more than one set of book by setting the Qty field. If user Click on Add to cart button item will added to cart List .

If user is not sign-in to account and if he/she clicks on add to cart button it will display message as “ Please login First ! ” .

The screenshot shows a browser window with multiple tabs open. The active tab displays a red banner with the text "Please Login First". Above the banner is a header with the "Yoga Education" logo and navigation links: HOME, CAMPS, BOOKS (highlighted), CART, ABOUT US, CONTACT, and Profile. Below the header is a large image of bookshelves filled with books. Overlaid on the image is the text "BOOK STORE" and "No of books Published 250 +". The browser's address bar shows the URL "localhost/project/book/insertCart.php". The taskbar at the bottom of the screen shows various application icons and the system clock indicating "14:16 02-05-2020".

If user clicks on add to cart button it will display message of number of item added to cart.

And if you click on logout button session[‘cid’] will destroyed .

And profile and cart section will display message as ‘Please Login First’ .

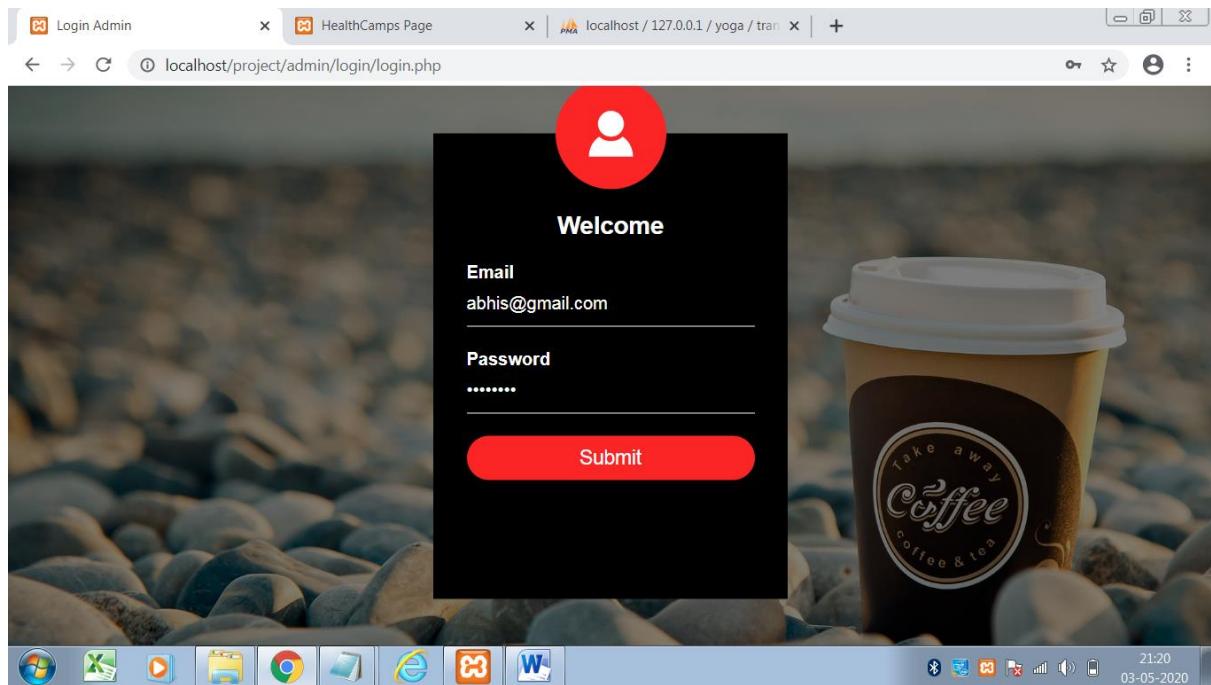

Admin Interface :

Admin Login: Admin Interface starts from home page .

If admin is not login then it will display as 'Please Login first' Link to login page of admin interface. If admin is not sign up then he/she cannot access any page from admin interface.

If user enters correct email n password then login page redirect to admin Home page.

Admin Home :

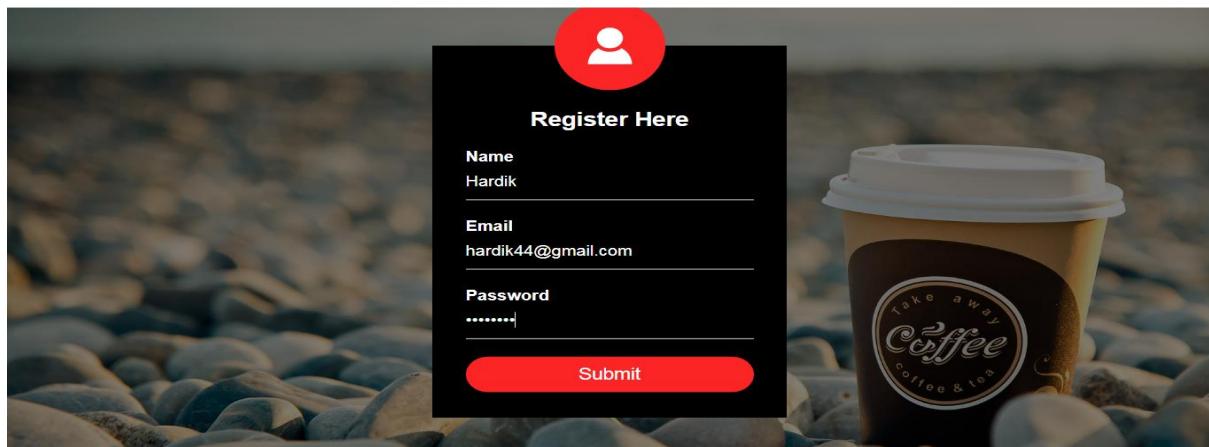

The screenshot shows a web browser window with three tabs: "Admin Panel", "HealthCamps Page", and "localhost / 127.0.0.1 / yoga / adm...". The main content area is titled "Admin Panel" and features a "Good Evening!" greeting for "Admin ABHI". Below this, there is a table titled "Add New Admin" with one row of data:

Name	Email	CreteOn	Remove
abhi	abhis@gmail.com	2020-04-17 18:48:46	

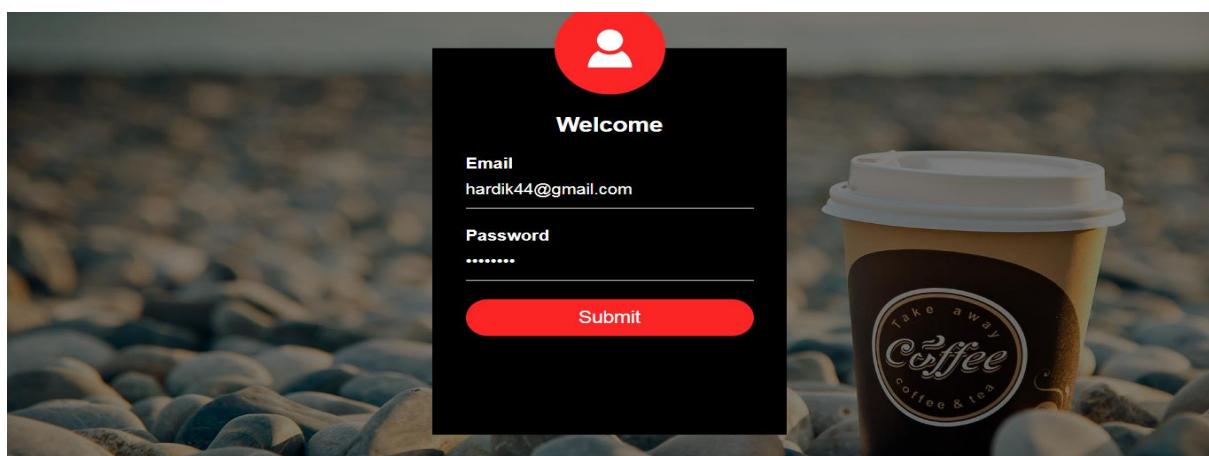

The status bar at the bottom shows system icons and the date/time: 21:36 03-05-2020.

In Admin Home, According to time the greetings will change, admin can add new admin and remove admin.

Add new admin link will redirect you to registration page.

If User successfully registers then it will redirect you to login page again.

After login it will come back to home page with session value as Admin name.

The screenshot shows the Admin Panel interface. At the top, there is a header with a menu icon, the text "Admin Panel", and a logo for "Yoga Education". Below the header, a large greeting message says "Good Evening! Admin" followed by the name "ABHI". A "Logout" link is located in the top right corner. A table titled "Add New Admin" lists two entries:

Name	Email	CreteOn	Remove
abhi	abhis@gmail.com	2020-04-17 18:48:46	
hardik	hardik44@gmail.com	2020-05-03 21:46:17	

Admin can remove other Admin except Main admin.

The screenshot shows the Admin Panel interface. At the top, there is a header with a menu icon, the text "Admin Panel", and a logo for "Yoga Education". Below the header, a large greeting message says "Good Evening! Admin" followed by the name "ABHI". A "Logout" link is located in the top right corner. abhi	abhis@gmail.com	2020-04-17 18:48:46	

Admin Camp page:

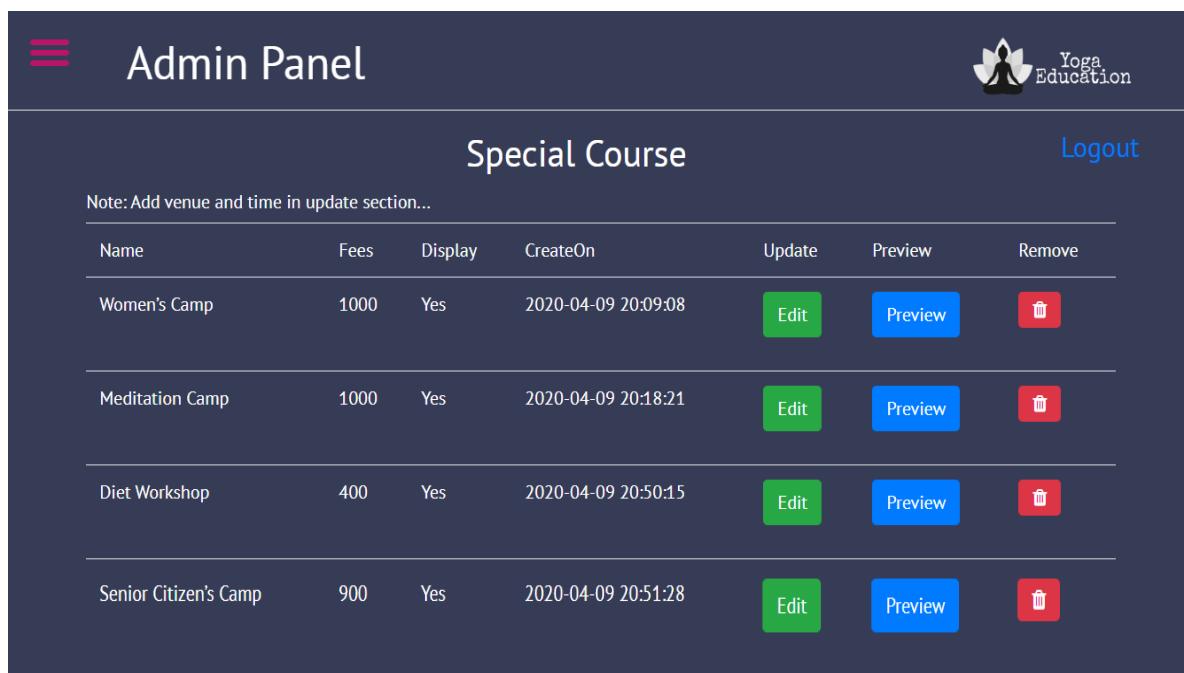

Admin camp page will display list of course. In each camp admin can view / add / remove course.

The screenshot shows the 'Admin Panel' header with a logo for 'Yoga Education'. Below it, the text 'Camps Page :' is displayed. A horizontal line separates this from a list of camp categories: 'Special Courses', 'Regular Classes', 'Health Camps', and 'Teacher Training Courses'.

Here we are selecting Special Course. Other camps are similar to each other.

In Special Course page admin can edit the exiting camp, he can preview the camp and decide what changes needs to be done? Admin can remove camp from Special Course.

The screenshot shows the 'Admin Panel' header with a logo for 'Yoga Education'. Below it, the text 'Special Course' is displayed. A note says 'Note: Add venue and time in update section...'. A table lists four camps with columns: Name, Fees, Display, CreateOn, Update, Preview, and Remove. Each camp row has three buttons: 'Edit' (green), 'Preview' (blue), and 'Remove' (red).

Name	Fees	Display	CreateOn	Update	Preview	Remove
Women's Camp	1000	Yes	2020-04-09 20:09:08	Edit	Preview	Trash
Meditation Camp	1000	Yes	2020-04-09 20:18:21	Edit	Preview	Trash
Diet Workshop	400	Yes	2020-04-09 20:50:15	Edit	Preview	Trash
Senior Citizen's Camp	900	Yes	2020-04-09 20:51:28	Edit	Preview	Trash

Admin can add new Course in Special Course :

The screenshot shows a web browser window with three tabs: 'Admin Panel', 'SpecialCourses Page', and 'Yoga Teacher Training Course &'. The current page is 'localhost/project/admin/campsSpecial/special.php'. The title of the page is 'Add Special Course'. The form has fields for 'Detail Camp Name' (containing 'Life Management Camp'), 'Program Details' (containing a description about enhancing personality through yoga), 'Price' (set to 800), 'Page Image' (with an upload button and file chosen 'life-management-camp.jpg'), and a checked checkbox for 'Conform'. At the bottom are 'Add' and 'Reset' buttons.

If all the field are correctly fill and user clicks on add button it will add course to Special Course with display Value as No.

The screenshot shows a web browser window with three tabs: 'Admin Panel', 'SpecialCourses Page', and 'Yoga Teacher Training Course &'. The current page is 'localhost/project/admin/campsSpecial/special.php'. The title of the page is 'Special Course'. The table lists five courses:

Name	Fees	Display	CreateOn	Update	Preview	Remove
Women's Camp	1000	Yes	2020-04-09 20:09:08	<button>Edit</button>	<button>Preview</button>	<button>trash</button>
Meditation Camp	1000	Yes	2020-04-09 20:18:21	<button>Edit</button>	<button>Preview</button>	<button>trash</button>
Diet Workshop	400	Yes	2020-04-09 20:50:15	<button>Edit</button>	<button>Preview</button>	<button>trash</button>
Senior Citizen's Camp	900	Yes	2020-04-09 20:51:28	<button>Edit</button>	<button>Preview</button>	<button>trash</button>
Life Management Camp	800	No	2020-05-02 15:35:27	<button>Edit</button>	<button>Preview</button>	<button>trash</button>

We can preview the added course by clicking on preview button.

The screenshot shows a web browser window with three tabs: "OneTTcPage", "SpecialCourses Page", and "Yoga Teacher Training Course". The main content area displays the "Life Management Camp" page from the "Yoga Education" website. The page features a header with a logo, navigation links for HOME, CAMPS (selected), BOOKS, ABOUT US, CONTACT, CART, and Profile. Below the header is a large image of a person performing a yoga pose. The title "Life Management Camp" is centered above a descriptive text block. The text explains the benefits of the camp, mentioning physical, mental, emotional, and spiritual enhancement through yoga, confidence, health, and a higher perspective. It also notes that the camp includes guidance on self-development, concentration, relaxation, and yogic techniques like Asanas, pranayamas, and kriyas. Below the text are sections for "Fees : 800" and "Venues :" with a dropdown menu. A "Enroll Course" button is at the bottom. At the bottom of the page is a footer with contact information, office hours, social media links, and a copyright notice.

Still we need to create venues for camps. For that we have click edit button and add venue section.

The screenshot shows a web browser window with four tabs: "AdminCamp", "SpecialCourses Page", "Yoga Teacher Training Course", and "Still definition and meaning". The main content area displays the "Add Venue" dialog box over a dark background. The dialog box has fields for Date (01-06-2020), Time (10.30AM-12.30PM), and Venue (Mumbai). There are "Close" and "ADD" buttons at the bottom. In the background, the "Life Management Camp" page is visible with sections for Program Details, Price (800), and Venues. The "Venues" section shows a table with columns for Sr. and Date. At the bottom of the screen is a taskbar with various icons and a system tray showing the date and time (02-05-2020, 15:50).

Recently add camp course will not be displayed no user interface because of display value is No. when admin updates the display value as Yes then New camps course will be displayed on user interface.

To update the display value admin needs to click on edit button. From this edit section admin can make changes in camp course and he can add venues for camp.

8 Title Page Name
Life Management Camp

Program Details:
Enhance your personality - physically, mentally, emotionally and spiritually through yoga. Gain in confidence, health and a higher perspective through the yoga way of life. The 1 day camp for Personality Development includes guidance on self-

Life Management Camp	600	Yes	2020-05-02 15:35:27			

The final preview

A screenshot of a web browser showing the 'Life Management Camp' preview page. The title 'Life Management Camp' is at the top. Below it is a photograph of a person performing a tree pose (Vrikshasana). To the right of the photo is a descriptive text block: 'Enhance your personality – physically, mentally, emotionally and spiritually through yoga. Gain in confidence, health and a higher perspective through the yoga way of life. The 1 day camp for Personality Development includes guidance on self-development, concentration and relaxation, besides yogic techniques e.g. Asanas, pranayamas and kriyas.' Below this text are two bold labels: 'Fees : 600' and 'Venues :'. A dropdown menu shows 'Date : 2020-06-01 (10.30AM-12.30PM) branch : Mumbai'. At the bottom is a grey button labeled 'Enroll Course'. The browser's address bar shows 'localhost/project/admin/campsSpecial/preview.php'. The taskbar at the bottom of the screen displays various application icons.

If admin clicks on remove button the course will be removed from Special Course. Here We are removing Life Management Camp.

Before

A screenshot of the Admin Panel showing the 'Special Course' list. The table has columns: Name, Fees, Display, CreateOn, Update, Preview, and Remove. The 'Remove' button for the 'Life Management Camp' row is highlighted. The table data is as follows:

Name	Fees	Display	CreateOn	Update	Preview	Remove
Women's Camp	1000	Yes	2020-04-09 20:09:08	Edit	Preview	
Meditation Camp	1000	Yes	2020-04-09 20:18:21	Edit	Preview	
Diet Workshop	400	Yes	2020-04-09 20:50:15	Edit	Preview	
Life Management Camp	600	Yes	2020-05-02 15:35:27	Edit	Preview	

After

A screenshot of the Admin Panel showing the 'Special Course' list after the 'Life Management Camp' has been removed. The table now only contains three rows: Women's Camp, Meditation Camp, and Diet Workshop. The 'Remove' button for the 'Life Management Camp' row is no longer present. The table data is as follows:

Name	Fees	Display	CreateOn	Update	Preview	Remove
Women's Camp	1000	Yes	2020-04-09 20:09:08	Edit	Preview	
Meditation Camp	1000	Yes	2020-04-09 20:18:21	Edit	Preview	
Diet Workshop	400	Yes	2020-04-09 20:50:15	Edit	Preview	

Admin camp Enrolment view:

Here admin can view enrolment for each camp. Admin can view the payment Acknowledgement of user.

The screenshot shows a web browser window titled "Admin panel" with the URL "localhost/project/admin/admincampenrollment.php". The page has a dark blue header with the "Admin Panel" logo and a "Yoga Education" logo. Below the header, the text "CampEnrollment Page :" and "Logout" are visible. The main content area contains four large, bold, white text links: "Special Courses", "Regular Classes", "Health Camps", and "Teacher Training Courses". At the bottom of the page, there is a toolbar with various icons and a system tray showing the date and time as 02-05-2020.

Suppose admin wants to view Health Camps enrolments:

The screenshot shows a web browser window titled "Admin panel" with the URL "localhost/project/admin/campEnrollments/healthenroll.php". The page has a dark blue header with the "Admin Panel" logo and a "Yoga Education" logo. Below the header, the text "Enrollments of Health Camp" and "Logout" are visible. The main content area is a table showing three rows of enrollment details. The columns are: Cid, Name, OrderId, CampName, Validity, Remove, and Document. The first row shows Cid 1, Name ABHISHEK SAWANT, OrderId ORDS87156681, CampName Stress Management Camp, Validity Expiry Date: 2020-07-01 Active, with a red trash icon and a blue "View Detail" button. The second row shows Cid 2, Name HARDIK SALVI, OrderId ORDS76202362, CampName Weight Management, Validity Expiry Date: 2020-05-24 Active, with a red trash icon and a blue "View Detail" button. The third row shows Cid 1, Name ABHISHEK SAWANT, OrderId ORDS50752204, CampName Diabetes Camp, Validity Expiry Date: 2020-05-03 Expired, with a red trash icon and a blue "View Detail" button. At the bottom of the page, there is a toolbar with various icons and a system tray showing the date and time as 04-05-2020.

In this page customer Id , name , order reference number , camp name and its validity will be displayed Admin can view the document and if validity is expired then he can remove the enrolment .

If the validity of enrolment is not expired then admin can't remove that enrolment from camps record.

Cid	Name	OrderId	CampName	Validity	Remove	Document
1	ABHISHEK SAWANT	ORDS87156681	Stress Management Camp	Expiry Date: 2020-07-01 Active		View Detail
2	HARDIK SALVI	ORDS76202362	Weight Management	Expiry Date: 2020-05-24 Active		View Detail <small>Course is active you can't remove this.</small>
1	ABHISHEK SAWANT	ORDS50752204	Diabetes Camp	Expiry Date: 2020-05-03 Expired		View Detail

If the validity of enrolment is expired then admin can remove that enrolment from camps record. Here I am removing expired Diabetes camp enrolment.

Cid	Name	OrderId	CampName	Validity	Remove	Document
1	ABHISHEK SAWANT	ORDS87156681	Stress Management Camp	Expiry Date: 2020-07-01 Active		View Detail
2	HARDIK SALVI	ORDS76202362	Weight Management	Expiry Date: 2020-05-24 Active		View Detail

If admin can view all the details about enrolment including payment information, user information , camp Join date and other details by clicking on view detail button.

Admin Book Store page:

In this page admin can view the product/book available. He can change price, description of book and also remove book from list.

The screenshot shows a web browser window titled "Admin panel" with the URL "localhost/project/admin/adminbook/adminbooks.php". The page has a dark blue header with the title "Admin Panel" and a logo for "Yoga Education" featuring a stylized lotus flower and person icon. Below the header is a sub-header "Update your Book" and a "Logout" link. The main content is a table with columns: Id, Title, Price, Description, CreateOn, Display, Update, and Remove. There are four rows of data, each with a green "Edit" button and a red "Remove" button. The table data is as follows:

Id	Title	Price	Description	CreateOn	Display	Update	Remove

Admin Panel

Good Evening!
Admin

Please Login First

The taskbar at the bottom of the screen shows various application icons.

Chapter 7

CONCLUSIONS

7.1 CONCLUSION

User or yogis can find hundreds of class plans on website. efficient way dealing with all yoga related business. It reduces the time consuming traditional paper work in enrollment of camps. It make easy to maintain all document. It generates proper report with all payment information. It reduces the time consuming traditional paper-work.

The website is dynamic so that admin can add product or book any time and admin can Update product or book any time and more efficiently.

7.2 LIMITATION OF THE SYSTEM

- If user forgot passwords then he/she has to create new account.
- The Website does not include tracking feature so that user is not able to keep track on his/her order.
- website does not store user old data , hence Whenever user place a new order , Enroll camp and for repeat purchase he/she have to enter all details like name residential address , mobile number etc.

7.3 FUTURE SCOPE OF PROJECT

- Adding user feedback and rating to the camp and books
- Adding online video tutorial's feature
- Order tracking feature
